A comprehensive, integrated, and accessible textbook presenting core neuroscientific topics from a computational perspective, tracing a path from cells and circuits to behavior and cognition. This textbook presents a wide range of subjects in neuroscience from a computational perspective. It offers a comprehensive, integrated introduction to core topics, using computational tools to trace a path from neurons and circuits to behavior and cognition. Moreover, the chapters show how computational neuroscience—methods for modeling the causal interactions underlying neural systems—complements empirical research in advancing the understanding of brain and behavior. The chapters—all by leaders in the field, and carefully integrated by the editors—cover such subjects as action and motor control; neuroplasticity, neuromodulation, and reinforcement learning; vision; and language—the core of human cognition. The book can be used for advanced undergraduate or graduate level courses. It presents all necessary background in neuroscience beyond basic facts about neurons and synapses and general ideas about the structure and function of the human brain. Students should be familiar with differential equations and probability theory, and be able to pick up the basics of programming in MATLAB and/or Python. Slides, exercises, and other ancillary materials are freely available online, and many of the models described in the chapters are documented in the brain operation database, BODB (which is also described in a book chapter). What makes a hit a hit? In Hit Makers, Atlantic Senior Editor Derek Thompson puts pop culture under the lens of science to answer the question that every business, every producer, every person looking to promote themselves and their work has asked. Drawing on ancient history and modern headlines - from vampire lore and Brahms's Lullaby to Instagram - Thompson explores the economics and psychology of why certain things become extraordinarily popular. With incisive analysis and captivating storytelling, he reveals that, though blockbuster films, Internet memes and number-one songs seem to have come out of nowhere, hits actually have a story and operate by certain rules. People gravitate towards familiar surprises: products that are bold and innovative, yet instantly comprehensible. Whether he is uncovering the secrets of JFK and Barack Obama's speechwriters or analysing the unexpected reasons for the success of Fifty Shades of Grey, Thompson goes beyond the cultural phenomena that make the news by revealing the desires that make us all human. While technology might change, he shows, our innate preferences do not, and throughout history hits have held up a mirror to ourselves. From the dawn of Impressionist art to the future of Snapchat, from small-scale Etsy entrepreneurs to the origin of Star Wars, Derek Thompson tells the fascinating story of how culture happens - and where genius lives.

Die Stewardship-Verantwortung ist spätestens mit Veröffentlichung der überarbeiteten Aktionärsrechterichtlinie im Sommer 2017 für alle europäischen Mitgliedsstaaten ein Thema geworden. Den UK Stewardship Code zum Vorbild nehmend, schlägt die Richtlinie eine europäische Wahrnehmung von langfristigem und nachhaltigem Investitionsverhalten durch institutionelle Investoren vor. Unter besonderer Berücksichtigung der historischen Entwicklung der (deutschen) Aktiengesellschaft werden in diesem Buch zunächst die Grundlagen der Rolle institutioneller Investoren als Aktionäre dargestellt und international bereits bestehende Stewardship-Kodizes miteinander verglichen. Aufbauend auf die Darstellung der überarbeiteten Aktionärsrechterichtlinie 2017/828/EU wird im Weiteren besonders auf die Umsetzung der Richtlinie und des Themas Stewardship in Deutschland eingegangen. Ein besonderer Schwerpunkt wird dabei auf die in der juristischen Literatur kontrovers diskutierten Probleme des Kontaktes (institutioneller) Aktionäre zum Aufsichtsrat sowie die informationelle Gleichbehandlung der Aktionäre gelegt. Abschließend wird ein vollständiger Vorschlag für einen ersten "Deutschen Stewardship Kodex" ausgearbeitet und anhand der gefundenen Erkenntnisse kommentiert.
