"In a storytelling approach that weaves contemporary examples together with historical context, By the People: Debating American Government, Brief Fifth Edition explores the themes and ideas that drive the great debates in American government and politics. It introduces students to big questions like "Who governs?" "How does our system of government work?" "What does government do?" and "Who are we?" By challenging students with these questions, the text gets them to engage with, think about, and debate the merits of U.S. government and politics. The brief version of

this text has 14 chapters (vs. 18 in Big), but still includes policy coverage"--

The political philosophy of liberalism was first formulated during the Enlightenment in response to the growth of the modern nation-state and its authority and power over the individuals living within its boundaries. Liberalism is now the dominant ideology in the Western world, but it covers a broad swathe of different (and sometimes rival) ideas and traditions and its essential features can be hard to define. The Cambridge Companion to Liberalism offers a rich and accessible exploration of liberalism as a tradition of political thought. It includes chapters on the historical development of liberalism, its normative foundations, and its core philosophical concepts, as well as a survey of liberal approaches and responses to a range of important topics including freedom, equality, toleration, religion, and nationalism. The volume will be valuable for students and scholars in political philosophy, political theory, and the history of political thought.

This book is inspired by the international movement towards the criminalisation of cartel conduct over the last decade. Led by US enforcers, criminalisation has been supported by a growing number of regulators and governments. It derives its support from the simple yet forceful proposition that criminal sanctions, particularly jail time, are the most effective deterrent to such activity. However, criminalisation is much more complex than that basic proposition suggests. There is complexity both in terms of the various forces that are driving and shaping the movement (economic, political and social) and in the effects on the various actors involved in it (government, enforcement agencies, the business community, judiciary, legal profession and general public). Featuring contributions from authors who have been at the forefront of the debate around the world, this substantial 19-chapter volume captures the richness of the criminalisation phenomenon and considers its implications for building an effective criminal cartel regime, particularly outside of the US. It adopts a range of approaches, including general theoretical perspectives (from criminal theory, economics, political science, regulation and criminology) and case-studies of the experience with the design and enforcement of existing or contemplated criminal cartel regimes in various jurisdictions (including in Australia, Canada, EU, Germany, Ireland and the UK). The book also explores the international dimensions of criminalisation - its specific practical consequences (such as increased potential for extradition) as well as its more general implications for trends of harmonisation or convergence in competition law and enforcement.

In this enhanced edition, Larry Arnhart continues to ask thought-provoking questions that illuminate the philosophies of some of the most prominent political thinkers throughout history. This clear, well-written guide is an ideal supplement to the original texts he recommends at the beginning of each chapter. In addition to his analysis of Plato, Aristotle, Augustine, Aquinas, Machiavelli, Descartes, Rousseau, Hegel, Marx, Nietzsche, and Rawls, the author's well-organized and insightful approach provides an even more comprehensive overview than the earlier editions:

- Supplementing the discussion of Leviathan, the chapter on Thomas Hobbes covers Behemoth.
- The chapter on John Locke includes his Letter Concerning Toleration as well as the original discussion of Second Treatise of Government.
- A chapter on Adam Smith has been added, which discusses Theory of Moral Sentiments and Wealth of Nations.
- Leo Strauss is featured, with an examination of Persecution and the Art of Writing and Natural Right and History.
- A final chapter analyzes Steven Pinker's The Better Angels of Our Nature.

States increasingly cooperate to buy expensive defence equipment, but the management and legal aspects of these large collaborative procurement programmes are complex and not well understood. The Law of Collaborative Defence Procurement in the European Union analyses how these programmes are managed, and highlights areas which require

improvement. The book addresses the law applicable to these programmes, which is built upon a four-layer 'matryoshka doll' of legal relationships at the crossroads of public international law, EU law and domestic law. Using practical examples, the book makes proposals for clarifying the legal basis and improving the efficiency of defence equipment cooperation among EU member states. By covering a broad scope of legal issues, this analysis goes beyond the defence sector and is relevant to centralised or joint purchasing and procurement activities of international organisations, providing invaluable information for practitioners, policy-makers and academics aiming to analyse or improve these projects.

This convenient Portable Version of Edwards/Wattenberg/Lineberry, *Government in America: People, Politics, and Policy* features all the content of the original comprehensive text split into four lightweight, paperbacks—accompanied by new practice tests at the back of each volume. Framing its content within a resonant “politics matters” theme and emphasizing public policy throughout, *Government in America* illustrates the impact that government has on the daily lives of each and every American, motivating students to become active participants in all aspects of our political system, and helping overcome the biggest challenge instructors face in this course -- student apathy toward government.
