received his B.S. from Cornell University and then moved to the University of California, Berkeley to pursue his graduate studies. His Ph.D. from Berkeley, awarded in 1955, completed his formal American education which was the purpose of his immigration from his native Kandahar in Afghanistan. In his over 50 years at Riverside, Mir has made an incalculable impact on vector biology both within the United States and in developing countries throughout the world. Within Southern California, Mir's basic and applied research led to the rapid and sustainable control of mosquitoes and eye gnats in the Coachella Valley and so directly enabled this region to grow to the thriving, large community it is today. In 2006 his efforts in facilitating the development of the low desert of southern California were recognized through the dedication of the Mir S. Mulla Biological Control Facility by the Coachella Valley Mosquito and Vector Control District. His success has been so profound that it remains somewhat cryptic to the many who now reside in, visit, and enjoy, this region of California, oblivious to the insect problems that severely restrained development until Mir and his students first applied their expertise many decades ago.

Mullets (grey mullets) are a family (Mugilidae) and order of ray-finned fish found in temperate and tropical waters worldwide. There are approximately 80 species of mullet; these fish have been considered an important food source in Mediterranean Europe since Roman times. This book provides a long overdue update on the biology and ecology of mullets and features comprehensive coverage of the key features of the Mugilidae family, such as recent DNA evidence and morphological data that challenge the traditional taxonomy.

SHEETS EXCERPT About Research & Education Association Research &  
Education Association (REA) is an organization of educators, scientists, and

engineers specializing in various academic fields. Founded in 1959 with the purpose of disseminating the most recently developed scientific information to groups in industry, government, high schools, and universities, REA has since become a successful and highly respected publisher of study aids, test preps, handbooks, and reference works. REA's Test Preparation series includes study guides for all academic levels in almost all disciplines. Research & Education Association publishes test preps for students who have not yet completed high school, as well as high school students preparing to enter college. Students from countries around the world seeking to attend college in the United States will find the assistance they need in REA's publications. For college students seeking advanced degrees, REA publishes test preps for many major graduate school admission examinations in a wide variety of disciplines, including engineering, law, and medicine. Students at every level, in every field, with every ambition can find what they are looking for among REA's publications. While most test preparation books present practice tests that bear little resemblance to the actual exams, REA's series presents tests that accurately depict the official exams in both degree of difficulty and types of questions. REA's practice tests are always based upon the most recently administered exams, and include every type of question that can be expected on the actual exams. REA's publications and

Advances in Microbial Ecology was established by the International Committee on Microbial Ecology (ICOME) to provide a vehicle for in-depth, critical, and even provocative reviews to emphasize recent trends in the important field of microbial ecology. Advances in Microbial Ecology is now recognized as a major source of information and inspiration both for practicing and for prospective microbial ecologists. Most reviews appearing in Advances have been prepared by leaders in particular areas following invitations issued by the Editorial Board. Individuals are encouraged, however, to submit outlines of unsolicited contributions to any member of the Editorial Board for consideration for publication in Advances. With the publication of Volume 12 of Advances in Microbial Ecology there will be a change of Editor and the entire Editorial Board. The current Editor wishes to take this opportunity to thank the present Editorial Board, Ron Atlas, Bo Barker

Jørgensen, and Gwyn Jones, as well as past members of the Board, for their assistance and encouragement over the years. The new Editor of *Advances in Microbial Ecology* will be Gwyn Jones, with Bernhard Schink, Warwick F. Vincent, and David M. Ward as members of the Editorial Board. The outgoing Board wish the new Board every success in continuing the traditions established by Martin Alexander, the founding Editor of *Advances in Microbial Ecology*. The topics featured in Volume 12 of *Advances* include some related to the metabolic activities of bacteria; namely, bioremediation of oil spills, by R. M. Atlas and R. Provides techniques for achieving high scores on the AP biology exam and includes two full-length practice tests.

Intensive preparation for the SAT II Biology E/M test includes a mini-diagnostic test and four full-length practice tests, all with answers and explanations. Two of the practice tests include core questions in general biology plus questions specifically relating to Biology E (Ecology). The other two tests include core questions and questions relating specifically to Biology M (Molecular Biology). An extensive subject review covers all test topics. They include: the cell and molecular biology; disease and the body's protective mechanisms; reproduction in lower organisms, plants, and animals; genetics; evolution; conservation of natural resources and environmental science; and the classification of living

things. The book also presents an overview of the SAT II Biology E/M test as well as useful test-taking tips.

REA's New 5th Edition of GRE Biology will help students master today's GRE Biology subject test. Student workbooks are designed to support your teaching and help your students skills development. Each topic covers 5-6 key topics in AS or A2 biology and concludes with synoptic questions drawing together different elements of the subject area. Each topic is relevant to the main specifications and comprises: 2 pages of background material(eg short descriptions and diagrams of biological

processes) giving an overview of the topic; and 4-5 pages of related exercises designed to develop and test student skills, using the background material and additional resources, with space provided for written answers. The workbooks are designed for systematic classroom use to support your own scheme of work, so you can either be guided by the structure of the workbook or use it as it corresponds to your own teaching programme. However, it is expected that students will tackle the topics in order as they will need to carry knowledge forward into each new topic area. The questions in the exercises take various forms. They have been written to help students develop skills that will serve them well in their exams, rather than to reflect the exam structure or test knowledge recall. Answers to the exercises are provided in an accompanying set of Teachers Notes. The notes serve as a guidance to teachers on what to expect from student responses, so where there is no objectively 'right' answer, the notes identify the key points that should appear in the answer. Student workbooks are available only in class sets of 10, priced at 35 per set plus postage and packing. Each set of workbooks includes one FREE copy of the Teachers Notes.
