Iconic Black Chicagoan profiles. This volume is a book of comedians, athletes, and musicians of Chicago. A must have for everyone who cherishes the history of Chicago within the African American community. A contemporary history of over 30 years. In the United States, as in many parts of the world, people are discriminated against based on the color of their skin. This type of skin tone bias, or colorism, is both related to and distinct from discrimination on the basis of race, with which it is often conflated. Preferential treatment of lighter skin tones over darker occurs within racial and ethnic groups as well as between them. While America has made progress in issues of race over the past decades, discrimination on the basis of color continues to be a constant and often unremarked part of life. In *Color Matters*, Kimberly Jade Norwood has collected the most up-to-date research on this insidious form of discrimination, including perspectives from the disciplines of history, law, sociology, and psychology. Anchored with historical chapters that show how the influence and legacy of slavery have shaped the treatment of skin color in American society, the contributors to this volume bring to light the ways in which colorism affects us all--influencing what we wear, who we see on television, and even which child we might pick to adopt. Sure to be an eye-opening collection for anyone curious about how race and color continue to affect society, *Color Matters* provides students of race in America with wide-ranging overview of a crucial

This celebration of Black resistance, from protests to art to sermons to joy, offers a blueprint for the fight for freedom and justice -- and ideas for how each of us can contribute. Many of us are facing unprecedented attacks on our democracy, our privacy, and our hard-won civil rights. If you're Black in the US, this is not new. As Colorlines editors Akiba Solomon and Kenrya Rankin show, Black Americans subvert and resist life-threatening forces as a matter of course. In these pages, leading organizers, artists, journalists, comedians, and filmmakers offer wisdom on how they fight White supremacy. It's a must-read for anyone new to resistance work, and for the next generation of leaders building a better future. An estimated 45 million adults in the U.S. lack a credit score at time when credit invisibility can reduce one's ability to rent a home, find employment, or secure a mortgage or loan. As a result, individuals without credit—who are disproportionately African American and Latino—often lead separate and unequal financial lives. Yet, as sociologists and public policy experts Frederick Wherry, Kristin Seefeldt, and Anthony

Alvarez argue, many people who are not recognized within the financial system engage in behaviors that indicate their credit worthiness. How might institutions acknowledge these practices and help these people emerge from the financial shadows? In *Credit Where It's Due*, the authors evaluate an innovative model of credit-building and advocate for a new understanding of financial citizenship, or participation in a financial system that fosters social belonging, dignity, and respect. Wherry, Seefeldt, and Alvarez tell the story of the Mission Asset Fund, a San Francisco-based organization that assists mostly low- and moderate-income people of color with building credit. The Mission Asset Fund facilitates zero-interest lending circles, which have been practiced by generations of immigrants, but have gone largely unrecognized by mainstream financial institutions. Participants decide how the circles are run and how they will use their loans, and the organization reports their clients' lending activity to credit bureaus. As the authors show, this system not only helps clients build credit, but also allows them to manage debt with dignity, have some say in the creation of financial products, and reaffirm their sense of social membership. The authors delve into the history of racial wealth inequality in the U.S. to show that for many black and Latino households, credit invisibility is not simply a matter of individual choices or inadequate financial education. Rather, financial marginalization is the result of historical policies that enabled predatory lending, discriminatory banking and housing practices, and the rollback of regulatory protections for first-time homeowners. To rectify these

inequalities, the authors propose common sense regulations to protect consumers from abuse alongside new initiatives that provide seed capital for every child, create affordable short-term loans, and ensure that financial institutions treat low- and moderate-income clients with equal respect. By situating the successes of the Mission Asset Fund in the larger history of credit and debt, *Credit Where It's Due* shows how to prioritize financial citizenship for all.

It's time for a REDEFINITION among black women in America. In its 2011 hardcover release, *Black Woman Redefined* was a top-selling book and took home a 2011 Best Non-Fiction Book of the Year Award from the African American Literary Awards. Author Sophia A. Nelson won the 2012 Champions of Diversity Award, given each year by diversity business executives in Fortune 100 companies. *Black Woman Redefined* was inspired in part by what Nelson calls "open season on accomplished black women": from Don Imus's name-calling of black female basketball players in 2007 and a 2009 Yale University study titled "Marriage Eludes High-Achieving Black Women," to the more recent revelation that First Lady Michelle Obama is concerned about being painted as an "angry, black woman." In *Black Woman Redefined*, Nelson sets out to change this cultural perception, taking readers on a no-holds-barred journey into the hearts and minds of accomplished black women to reveal truths, tribulations, and insights like never before. This groundbreaking book provides black women of a new generation with essential career and life-coaching advice. Based on never-before-done

research on college-educated, career-driven black women, Nelson offers her fellow "sisters"—and those who know, love, and work with them—a feel-good volume for personal and professional success that empowers them without tearing others down. Op onnavolgbare wijze beschrijft Yuval Noah Harari in zijn bestseller Sapiens 70.000 jaar menselijke evolutie, maar met Homo Deus richt hij zich op de toekomst. Met zijn kenmerkende vermenging van wetenschap, geschiedenis en filosofie onderzoekt Harari de dromen en nachtmerries van de eenentwintigste eeuw - van onsterfelijkheid tot kunstmatig leven. Hij stelt fundamentele vragen: Waar gaan we naartoe? Hoe beschermen we onze kwetsbare wereld tegen onze eigen verwoestende krachten? En als we in staat zijn door technologische vooruitgang ons lichaam en onze geest te verbeteren, wat gebeurt er dan met de mensen die zich niet laten upgraden? Wat voor sociale gevolgen zal deze tweedeling hebben? Volgens Harari is het essentieel om meer te begrijpen van de technologische revoluties om ons heen, anders hebben we geen invloed op de koers van onze toekomst. Dit is de volgende stap in onze evolutie. Dit is Homo Deus.

In highlighting the political and economic progress of African Americans while pinpointing the historical success of Barack Obama in the last presidential election, the book covers the history of the African peoples in the principal regions of Africa, the Caribbean, North America and South America. In reporting and acutely analyzing the same events of human history spanning over 1500 years, it initially delves into the

reactions from the political order in the form of the Tea Party Movement following Obama's victory. Totalling over 500 pages, the book then takes the reader on a trip down memory lane, covering events as the slave trade, discrimination and colonization that pitted Africans and their diasporic descendants against Europeans, and later Americans. After covering the critical stages of African Americans' economic and political development following the Civil War to present day, the book crosses the Atlantic Ocean to cover the major failures of political events after independence on the African continent. Two specific chapters in the book analyze the events under feudal Europe that led to the enslavement of Africans while another does the same on the system of capitalism. The final four chapters report and analyze Africa's present challenges and possible solutions.

Much has been written about the men and women who shaped the field of advertising, some of whom became legends in the industry. However, the contributions of African-American women to the advertising business have largely been omitted from these accounts. Yet, evidence reveals some trailblazing African-American women who launched their careers during the 1960s Mad Men era, and went on to achieve prominent careers. This unique book chronicles the nature and significance of these women's accomplishments, examines the opportunities and challenges they experienced and explores how they coped with the extensive inequities common in the advertising profession. Using a biographical narrative approach, this book examines the

careers of these important African-American women who not only achieved managerial positions in major mainstream advertising agencies but also established successful agencies bearing their own names. Based on their words and memories, this study reveals experiences which are intriguing, triumphant, bittersweet and sometimes tragic. These women's stories comprise a vital part of the historical narrative on women and African-Americans in advertising and will be instructive not only to scholars of advertising and marketing history but to future generations of advertising professionals.

De gruwelijke beelden van oorlogen en genocide die we op het nieuws zien geven ons de indruk dat onze tijd de gewelddadigste aller tijden is. Het omgekeerde is waar, laat Steven Pinker zien in *Ons beter ik..* Hoe komt het dat we ons zoveel menselijker gedragen? Ons leven is verbeterd - en zo gaan we indirect andermans leven meer waarderen. En hoe meer we met anderen te maken krijgen, des te meer groeit onderling begrip, zelfs al is dat soms uit egoïsme. Pinker laat zien dat empathie en zelfbeheersing op den duur sterkere eigenschappen zijn dan sadisme en wraak. *Ons beter ik* is een indrukwekkende, onmisbare geschiedenis van de menselijke omgang en een boek voor de eeuwigheid. STEVEN PINKER (Montréal, 1954) is een experimenteel psycholoog, en professor in Psychologie aan Harvard University. Hij schreef over taal en intelligentie in onder andere *Het taalinstinct* (1994), *Hoe de menselijke*

geest werkt (1997), Het onbeschreven blad (2002) en De stof van het denken (2007). Het unieke van Steven Pinker is dat hij zijn antwoorden op zoveel terreinen zoekt: psychologie, taalkunde, evolutiebiologie - en dat maakt hem ook meteen iemand die vanuit veel hoeken op debat en controversen kan rekenen. 'De stof van het denken is een rijk boek waarin Pinker laat zien hoe de werkelijkheid de taal bepaalt en de manier waarop we daarmee als biologische en sociale dieren hebben leren omgaan.' - DE STANDAARD 'Wie op de hoogte wil raken van een fascinerende nieuwe wetenschap, en bovendien graag spannende populair-wetenschappelijke boeken leest, moet zich Het taalinstinct niet laten ontgaan.' - TROUW

Nieuwspraak, Big Brother, het vocabulaire uit 1984 is in onze taal opgenomen en een eigen leven gaan leiden. De roman van George Orwell uit 1949 over de strijd van Winston Smith, ambtenaar op het ministerie van Waarheid, tegen de alles doordringende Partij, en zijn gedoemde liefde voor Julia heeft niets van zijn literaire zeggingskracht verloren. In Orwells steeds weer herdrukte anti-utopie verkeert de wereld in de wurggreep van een systeem dat is gegrondvest op de verbreiding van angst, haat en wreedheid, en dat iedere vorm van persoonlijke vrijheid en individualiteit uitsluit. 1984 is onverminderd geldig als benauwend nauwkeurig blauwdruk van elk dictatoriaal regime.

Essays debunking the notion that contemporary America is a colorblind society. More than half a century after the civil rights era of the mid-1950s to the late 1960s, American society is often characterized as postracial. In other words, that the country has moved away from prejudice based on skin color and we live in a colorblind society. The reality, however, is the opposite. African Americans continue to face both explicit and latent discriminations in housing, healthcare, education, and every facet of their lives. Recent cases involving law enforcement officers shooting unarmed Black men also attest to the reality: the problem of the twenty-first century is still the problem of the color line. In *Race Still Matters*, contributors drawn from a wide array of disciplines use multidisciplinary methods to explore topics such as Black family experiences, hate crimes, race and popular culture, residual discrimination, economic and occupational opportunity gaps, healthcare disparities, education, law enforcement issues, youth culture, and the depiction of Black female athletes. The volume offers irrefutable evidence that race still very much matters in the United States today. Dynamic, rapid, and radical changes are transforming the communication professions, provoking major implications for ethics. Traditional boundaries blur as media converge; relentless competitive pressures cause some forms of communication to atrophy and permit others to explode; and technological

advances occur daily. In this volume, a new generation of scholars take a fresh look at the manner in which ethical issues manifest themselves in their areas of research and suggest new agendas for future research. This book addresses a wide range of questions from a variety of communication professions.

Contributors tackle such issues as how to define a journalist in an era when anyone can disseminate information to a global audience; how to use "advergaming," crowdsourcing, and facial recognition technology in advertising responsibly; and how to respond ethically in situations of public crisis communication, among many others. This volume will be critical reading for scholars and professionals in media, communication, and digital arts, as well as philosophy, government, public policy, business, and law.

De oorlog die hem vernietigde, schiep hem als schrijver Gedurende acht jaar deed Shane Salerno voor een ambitieuze filmdocumentaire onderzoek naar het leven van J.D. Salinger (1919-2010), de wereldberoemde auteur van *The Catcher in the Rye*. Salinger publiceerde in relatief korte tijd, tot begin jaren zestig, vijf boeken en trok zich daarna terug uit de openbaarheid. Salerno interviewde meer dan 200 mensen die hem gekend hebben: familieleden, goede vrienden, geliefden en (jonge) minnaressen, brothers-in-arms tijdens de Tweede Wereldoorlog, klasgenoten, burens, redacteuren, uitgevers en collegas uit New

York. Het resultaat: de definitieve biografie van een van de meest fascinerende en raadselachtige figuren uit de moderne wereldliteratuur, die voor het eerst helderheid verschaft over de redenen van Salingers kluizenaarsbestaan.

Collective Unravelings of the Hegemonic Web represents the culmination of work that emerged from 2013 Curriculum & Pedagogy annual conference. The notion of the hegemonic web is the defining theme of the volume. In this collection, authors struggle to unravel and take apart pieces of the complex web that are so deeply embedded into normative ways of thinking, being and making meaning. They also grapple with understanding the role that hegemony plays and the influence that it has on identity, curriculum, teaching and learning. Finally, scholars included in this volume describe their efforts to engage and undergo counter-hegemonic movements by sharing their stories and struggles.

A History of Fort Worth in Black & White fills a long-empty niche on the Fort Worth bookshelf: a scholarly history of the city's black community that starts at the beginning with Ripley Arnold and the early settlers, and comes down to today with our current battles over education, housing, and representation in city affairs. The book's sidebars on some noted and some not-so-noted African Americans make it appealing as a school text as well as a book for the general reader. Using a wealth of primary sources, Richard Selcer dispels several enduring myths, for

instance the mistaken belief that Camp Bowie trained only white soldiers, and the spurious claim that Fort Worth managed to avoid the racial violence that plagued other American cities in the twentieth century. Selcer arrives at some surprisingly frank conclusions that will challenge current politically correct notions.

"Black people are not dark-skinned white people," says advertising visionary Tom Burrell. In fact, they are a lot more. They are survivors of the Middle Passage and centuries of humiliation and deprivation, who have excelled against the odds, constantly making a way out of "no way!" At this point in history, the idea of black inferiority should have had a "Going-Out-of-Business Sale." After all, Barack Obama has reached the Promised Land. Yet, as *Brainwashed: Challenging the Myth of Black Inferiority* testifies, too much of black America is still wandering in the wilderness. In this powerful examination of "the greatest propaganda campaign of all time" - the masterful marketing of black inferiority - Burrell poses 10 provocative questions that will make black people look in the mirror and ask why, nearly 150 years after the Emancipation Proclamation, so many blacks still think like slaves. *Brainwashed* is not a reprimand; it is a call to deprogram ourselves of self-defeating attitudes and actions. Racism is not the issue; how we respond to racism is the issue. We must undo negative brainwashing and claim a new state of race-based self-esteem and self-

actualization.

This volume explains what racial profiling is, who is likely to be targeted, and how to deal with the police if you are singled out. Readers will learn about the racial bias in the American justice and prison systems, as well as how to stay out of the school-to-prison pipeline.

Based on the premise that no one is born a failure, author James A. Barlow maintains it is necessary for young people, particularly those of color, to view themselves from a different perspective—one that embraces their strengths, defies racism, and rejects the self-destructive behavior that has contributed to the perpetual state of turmoil in which many find themselves. In *From the Corner to the Corner Office*, Barlow offers an autobiography that narrates his life story and then outlines the steps others can take to lead better lives. He discusses his struggles as a child and his experiences as a hustler. He highlights his achievements after turning his life around and illustrates how hard work, determination, goal-setting, and a positive attitude are the best remedies to counter Racism, Institutional failure, and Parental neglect ("RIP"). Barlow presents a blueprint, laying out the basic steps to improve one's life by emphasizing the importance of education, cultural awareness and self-determination.

Race and separate races of human beings do not exist. They are a myth. Yet, racism is very real. Because racism is the namesake of something that does not exist, there is general confusion about what it actually is. This confusion has served to protect racism,

and even reinforce it. By reviewing the entire history of racism, this book shows exactly what racism is: a subjective system of ranking groups of people and the belief that there is a natural social order of those groups. The lie of inferior and superior groups of people originated as a justification for slavery. Plantation owners, lawmakers, and scientists carefully nurtured the myth until long after slavery had ended. It has survived for centuries and continues to be used to separate people. Every white person needs to be aware of that history in order to understand how the myth of race and a hierarchy of humanity lingers in each of us and in all of our institutions.

Arguably all black communities are dysfunctional and African diaspora communities in prosperous western nations are not exempt. Some scholars have attributed Africans and its diasporas' woes to genetic inferiority. Many argue that Africans' problems are caused by their failure to adopt western democracy and to build strong institutions. This book demonstrates that issues such as the absence of strong institutions and bad leadership are not the root causes of Africa's miseries but are symptoms of more fundamental problems. Using empirical and qualitative studies, this book highlights the six root causes of the unending plight of Africa and its diasporas. It shows that the plight of Africans and African diasporas are interwoven, hence it addresses them concurrently. Femi Akomolafe brings to the fore his invaluable insights as an African who has lived in the UK diaspora for more than a decade in this book. *Black Damage* rests on the premise that the black race is damaged.

Ta-Nehisi Coates op rassenpolitiek tijdens en na het Obama-tijdperk Van de allereerste zwarte president van de Verenigde Staten naar de verkiezing van de man die door Coates wordt omschreven als de 'eerste witte president' van Amerika, Donald Trump. Het contrast kon nauwelijks groter zijn. En toch is dit niet de eerste keer in de Amerikaanse geschiedenis dat er na acht jaar van hoopvolle vooruitgang ineens een drastische koerswijziging plaatsvond. 'We waren acht jaar aan de macht,' zo klonk de klaagzang van zwarte politici toen de witte overheersing terugkeerde in het zuiden van de VS na een periode tijdens de Reconstructie waarin er een einde leek te komen aan de rassenscheiding. Coates verbindt het heden met dit tragische verleden en onderzoekt het presidentschap van Barack Obama en hoe de radicale ommekeer in Amerika tot stand is gekomen – en hoe het verleden toch altijd aanwezig blijft. Het boek bestaat uit een selectie van Coates' meest iconische publicaties voor The Atlantic en

Stigmatized. 'Tamed'. Celebrated. Erased. Managed. Appropriated. Forever misunderstood. Black hair is never 'just hair'. This book is about why black hair matters and how it can be viewed as a blueprint for decolonisation. Over a series of wry, informed essays, Emma Dabiri takes us from pre-colonial Africa, through the Harlem Renaissance, Black Power and on to today's Natural Hair Movement, the Cultural Appropriation Wars and beyond. We look everything from hair capitalists like Madam C.J. scholars and the dubious provenance of Kim Kardashian's braids. The scope of black hairstyling ranges from pop culture to cosmology, from prehistoric times to the (afro)futuristic. Uncovering sophisticated indigenous mathematical systems in black hairstyles, alongside styles that served as secret intelligence networks leading enslaved Africans to freedom, *Don't Touch My Hair* proves that far from being only hair, black hairstyling culture can be understood as an allegory for black oppression and, ultimately, liberation.

This timely, readable text offers an authoritative and balanced analysis of how racially driven policies in America impact post release education as a leading pathway to social reintegration. Compelling research findings from an assemblage of college faculty, seasoned administrators, and criminal justice professionals are interwoven with first-person narratives from formerly incarcerated individuals. This book takes full advantage of its interdisciplinary mixture of voices and positionality to build its argument upon a three-part framework from Critical Race Theory (CRT). It convincingly utilizes the tools of academic research, counterstories, and counterspaces to make a persuasive case that the intersection of race, the criminal justice system, and education represent one of the greatest civil rights issues of our time. Part 1, "Context, Critical Race Theory and College Re-Entry," explores the historical and current dynamics of these uniquely American intersections while linking Critical Race Theory with the field of re-entry and offering serious analysis of post incarceration and education initiatives. Interest convergence, white privilege, and writing from returning citizens as a way of "coming to voice" are also explored in this section. Part 2, "Counterstories," offers case, comparative case, and phenomenological studies that include embedded quotations with first-person narratives contributed from formerly incarcerated students and graduates. This section also

includes an honest and gripping analytic auto-ethnography from the book's co-editor who readily reveals his experiences as both a faculty member and formerly incarcerated individual. Other highlighted topics include the issues of stigma, overcoming obstacles in the classroom, and the unique problems for returning citizens when acclimating to college culture. Combining qualitative research and descriptions of successful programs Part 3, "Counterspaces," explores the dynamics of creating places within programs and classrooms that support physical, emotional, spiritual, and intellectual engagement for and with the formerly incarcerated through learner-centered, culturally sensitive, and racially explicit pedagogy. This book is designed to be a most welcome addition to any serious academic discussion focusing upon institutionalized racism and education's use as a tool in reversing the mass incarceration of people of color in America.

Can anybody tell us why profound poverty continues to plague our nation of barely 25 million people in this modern era of globalization in 2012? Why do you think the vast majority of our beloved people live on less than a dollar a day and struggle from cradle to grave living in near squalor, and eking out near subsistence existence? Ask yourself why is it that in the midst of this profound abject poverty less than ten percent of our fellow countrymen and women live in opulence and wallow in untold riches with their mansions encased with six-foot walls, seek medical attention in luxurious medical facilities abroad? Are the vast majority of our people in poverty ignorant and stupid, while the few wealthy ones are perceived as more intelligent and wiser than all of us?

This handbook illustrates how education scholars employ Critical Race Theory (CRT) as a framework to bring attention to issues of race and racism in education. It is the first

authoritative reference work to provide a truly comprehensive description and analysis of the topic, from the defining conceptual principles of CRT in Law that gave shape to its radical underpinnings to the political and social implications of the field today. It is divided into six sections, covering innovations in educational research, policy and practice in both schools and in higher education, and the increasing interdisciplinary nature of critical race research. New chapters broaden the scope of theoretical lenses to include LatCrit, AsianCrit and Critical Race Feminism, as well as coverage of Disability Studies, Research Methods, and other recent updates to the field. This handbook remains the definitive statement on the state of critical race theory in education and on its possibilities for the future.

Too Important to Fail: Saving America's Boys is the companion volume to TAVIS SMILEY REPORTS PBS special which is funded by the Corporation for Public Broadcasting as part of its American Graduate: Let's Make It Happen initiative. It examines an undeclared crisis in America—the staggering dropout rate among young black males. In countless urban schools the graduation rate has plummeted to less than 20% and nationwide fewer than 50% of young black males will graduate from high school. Low graduation rates combined with disproportionate rates of suspensions, expulsion and young black males assigned to special education classes, fuel this state of emergency. Tavis Smiley's candid conversations in Los Angeles, Chicago, Philadelphia and Oakland with frontline experts and educators, detention center administrators and the boys themselves urges viewers to ponder the societal and economic cost of losing another generation of uneducated young black males to lifetimes of prison and poverty. This volume picks up where the special leaves off with expanded discussion, dot-connecting data and real life examples of the information and resources

How do educators affect change within their everyday classroom practices without fostering further alienation and discord? Although much has already been written about race and racism in school, this book addresses racial incidents directly and offers practical insights into how P-20 educators can transform these events alongside students and colleagues. Each chapter provides detailed analysis of curriculum, instruction, practices and pedagogical strategies for addressing race while at the same time wrestling with theoretical conceptions of race, justice, and fairness.

This unprecedented, interdisciplinary collection focuses on gender, whiteness, and white privilege, and sheds light on this understudied subject matter in the context of clinical psychology, in both theories and applications.
