“No book could be more timely than *The Decline of Nature*. LaFreniere offers an in-depth analysis of the fundamental issues that must be faced if solutions for environmental crisis are to be found. His arguments are a refreshing alternative to the superficial policy proposals of politicians and the glib reporting of the mass media. — *The Decline of Nature* is a masterful critique of the stories that own us. LaFreniere's analytical effort is a veritable tour de force.” From the Foreword by Professor Max Oelschlaeger, Northern Arizona University “The virtue of his book is threefold: it ingeniously connects the latest findings of environmental science to the broad stream of cultural history; exposes the flaws inherent in western attitudes about nature, especially the destructive, providential "idea of nature; and revives the much neglected field of speculative philosophy of history” From an appreciation by Professor Klaus Fischer, author of “Oswald Spengler and the Decline of the West” and “Nazi Germany: A New History” “...Sweepingly brilliant!” Dr. J.Donald Hughes

Description: This work is a radical rethinking of the key currents of intellectual and environmental history. *The Decline of Nature* is an account of Western attitudes and behavior toward nature, from the deforestation of Western Europe during the High Middle Ages through the Scientific Revolution and the technological exploitation of nature in the 19th and 20th centuries, and

on to the Environmental Movement. The destruction of European and colonial ecosystems parallels the rise of modern mechanistic science and a science-based idea of progress which has been perverted by economic ideologies into a belief in unlimited development of nature-as-resources into the amenities of the consumer society. Ecosystems and species diversity have declined to isolated and shrinking remnants subject to further degradation due to global warming resulting from human intervention in global climate cycles. These massive changes will have a catastrophic effect upon evolutionary processes, mankind and the survival of the Earth. The Decline of Nature is an environmental history of ideas embedded in a compact account of Western civilization's ecological impact upon the planet, particularly in Europe and its colonies. The major thesis presented is the idea that two speculative philosophies of history (attempts to understand the meaning of history) and their associated worldviews have been largely responsible for destructive attitudes and behaviors towards nature. They include the idea of providence (i.e. the Christian worldview) and the idea of progress (the science and technology-based vision of unrestrained economic development and material accumulation since the 17th century). Some scholars understand the idea of progress as a secularization of the Christian millennium, the creation of a new Eden through science and technology. A third, alternative philosophy of history, the idea of history as multiple cycles of civilizations rising, flourishing, and declining, was popular in both classical Greco-Roman and ancient Asian civilizations, but was rejected by

Western civilization until its revival during the Renaissance and in 19th and 20th century. Oswald Spengler's *Decline of the West* was the founding work of cyclical philosophy of history in the 20th century. Spengler, Arnold Toynbee, and other 20th century speculative philosophers of history have been criticized by postmodern philosophers for creating logically indefensible "grand narratives". However, Spengler's mysterious cycles of civilization have found at least a partial scientific explanation in the new discipline of environmental history. Environmental degradation played a major role in the decline of ancient Mesopotamian, Greco-Roman, Mayan and Asian civilizations. Spengler was also perceptive in distinguishing the nature-destroying tendencies of humanity in general, and Western (Faustian) civilization in particular. This monograph reflects on the position of global societies facing environmental, social and economic destruction and the historical processes that have resulted in this crisis of both man and nature.

Hands: Physical Labor, Class, and Cultural Work centers what is usually decentered--the complex culture of working-class people. Janet Zandy begins by examining the literal loss of lives to unsafe jobs and occupational hazards. She asks critical and timely questions about worker representation--who speaks for employees when the mills, mines, factories, and even white-collar cubicles shut down? She presents the voices of working-class writers and artists, and discusses their contribution to knowledge and culture. This innovative study reveals the flesh and bone beneath the abstractions of labor, class, and culture. It is an essential contribution to the emerging field of working-class studies, offering a hybrid model for bridging communities and non-academic workers to scholars and institutions of knowledge.

In the 1850s, Newburyport, Massachusetts, was a bustling area thanks in part to the shipyards along the Merrimac River and the import of exotic goods from faraway ports. Many books have been written about the area but little is known about the workers in the city, where they came from, and how they helped Newburyport to grow and change. Using data from the 1850 Federal Census for Newburyport, Margaret P. Motes examines two subjects; the place of birth of all

residents born outside of Massachusetts (to demonstrate migration patterns) and the occupations of all of its residents (to demonstrate diversity of skills). The 1850 Federal Census data for occupations lists over two thousand people in the work force, but not surprisingly, few opportunities for women. Margaret P. Motes stated that upon examining the 1850 Newburyport City Directory, women were indeed listed with many varying occupations, though they were not recorded by the census taker. The largest number of immigrants came from Ireland but many came from England and Scotland as well, bringing with them skills and occupations like weaver, carpenter, shoemaker and mariner. Families with long ties to local names in the community might find some of their ancestors here. Prepared as part of the celebration of the Sesquicentennial of the City of Newburyport, there are over 4,800 individuals listed in this book between the ages of one month to ninety-two years old. Abstracted information includes name, age, sex, occupation, color, place of birth, household and dwelling number and the area within Newburyport. Names are listed alphabetically, then by age. Persons who are not found alphabetically are listed in the surname index. The appendix lists men who went to California, which was found in the 1850 Newburyport City Directory. There are three indices: full-name, occupation, and place of birth.

Why would someone decide to become a psychotherapist? It is well-known within the field that psychoanalysts and psychotherapists are often drawn to their future professions as a result of early traumatic

experiences and being helped by their own psychoanalytic treatment. While dedicating their lives to relieving emotional suffering without being judgmental, they fear compromising their reputations if they publicly acknowledge such suffering in themselves. This phenomenon is nearly universal among those in the helping professions, yet there are few books dedicated to the issue. In this innovative book, Farber and a distinguished range of contributors examine how the role of the 'wounded healer' was instrumental in the formulation of psychoanalysis, and how using their own woundedness can help clinicians work more effectively with their patients, and advance theory in a more informed manner. Celebrating the Wounded Healer Psychotherapist will be of interest to psychoanalysts and psychoanalytic psychotherapists, graduate students in clinical disciplines including psychology, social work, ministry/chaplaincy and nursing, as well as the general public.

Stress is a universal phenomenon that impacts adversely on most people. Following on the heels of Stress Science: Neuroendocrinology and Stress Consequences: Mental, Neuropsychological and Socioeconomic, this third derivative volume will provide a readily accessible and affordable compendium that explains the phenomenon of stress as it relates physically and mentally to war, conflict and disaster. The first section will be dedicated to study of the link between stress and various forms of conflict. Specific instances of conflict will be discussed - the Gulf wars, Korea, Hiroshima bombing, the Holocaust, 9/11, Northern

Ireland, terrorism in general, torture. The second section will explore the stress impact of more general physical disasters such as airline and vehicle accidents, earthquakes, floods, and hurricanes. The final section will focus on the clinical relationship between conflict stress and various mental diseases – PTSD, suicide, disaster syndrome, etc – as well as the adverse impact of stress on human physical health in general.

Comprised of about 100 top articles selected from Elsevier's Encyclopedias of Stress, the volume will provide a valuable desk reference that will put relevant articles readily at the fingertips of all scientists who consider stress. Chapters offer impressive and unique scope with topics addressing the relationship between stress generated by war, conflict and disaster and various physical/mental disorders Richly illustrated with over 200 figures, dozens in color Articles carefully selected by one of the world's most preeminent stress researchers and contributors represent the most outstanding scholarship in the field, with each chapter providing fully vetted and reliable expert knowledge The British have been baking for centuries. Here, for the first time, is a comprehensive account of how our relationship with this much-loved art has changed, evolved and progressed over time. Renowned food historian and author, Emma Kay, skillfully combines the related histories of Britain's economy, innovation, technology, health, cultural and social trends with the personal stories of many of the individuals involved with the whole process: the early pioneers, the recipe writers, the cooks, the entrepreneurs. The result is a deliciously

With over thirty thousand occupations currently in existence, workers today face a bewildering array of careers from which to choose, and upon which to center their lives. But there is more at stake than just a paycheck. For too long, work has driven a wedge between families, dividing husband from wife, father from son, mother from daughter, and family from home. Building something that will last requires a radically different approach than is common or encouraged today. In *Durable Trades*, Groves uncovers family-centered professions that have endured the worst upheavals in history--including the Industrial Revolution--and continue to thrive today. Through careful research and thoughtful commentary, Groves offers another way forward to those looking for a more durable future.

The first comprehensive history of seventeenth-century London, told through the lives of those who experienced itThe Gunpowder Plot, the Civil Wars, Charles I's execution, the Plague, the Great Fire, the Restoration, and then the Glorious Revolution: the seventeenth century was one of the most momentous times in the history of Britain, and Londoners took center stage. In this fascinating account, Margarette Lincoln charts the impact of national events on an ever-growing citizenry with its love of pageantry, spectacle, and enterprise. Lincoln looks at how religious, political, and financial tensions were fomented by commercial ambition, expansion, and hardship. In addition to events at court and parliament,

'A big historical advance. Ours, it turns out, is a very un-insular "Island Story". And its 17th-century chapter will never look quite the same again' John Adamson, Sunday Times A ground-breaking portrait of the most turbulent century in English history Among foreign observers, seventeenth-century England was known as 'Devil-Land': a diabolical country of fallen angels, torn apart by seditious rebellion, religious extremism and royal collapse. Clare Jackson's dazzling, original account of English history's most turbulent and radical era tells the story of a nation in a state of near continual crisis. As an unmarried heretic with no heir, Elizabeth I was regarded with horror by Catholic Europe, while her Stuart successors, James I and Charles I, were seen as impecunious and incompetent, unable to manage their three kingdoms of England, Scotland and Ireland. The traumatic civil wars, regicide and a republican Commonwealth were followed by the floundering, foreign-leaning rule of Charles II and his brother, James II, before William of Orange invaded England with a Dutch army and a new order was imposed. Devil-Land reveals England as, in many ways, a 'failed state': endemically unstable and rocked by devastating events from the Gunpowder Plot to the Great Fire of London. Catastrophe nevertheless bred creativity, and Jackson makes brilliant use of eyewitness accounts - many penned by stupefied foreigners - to dramatize her great story. Starting on the eve of the Spanish Armada's descent in 1588 and concluding with a not-so 'Glorious Revolution' a hundred

years later, Devil-Land is a spectacular reinterpretation of England's vexed and enthralling past.

Based on The Walking Dead graphic novels/comic books and the acclaimed television show, The Walking Dead Omnibus contains the first four titles in the book series by Robert Kirkman and Jay Bonansinga. Set in the world created by Robert Kirkman this is fast-paced, action-packed storytelling about the lengths some men will go to survive. With new characters, new storylines and with the same in-depth character-based plotting that has made the television series such an immediate hit, this is sure to be a hit with those who love zombies and those who have loved the TV series and comic books. This omnibus edition contains the following novels: Rise of the Governor The Road to Woodbury The Fall of the Governor: Part One The Fall of the Governor: Part Two Examines the growth and influence of the theatre in the development of the young American Republic.

Hazel Forsyth delves in to never-before-studied primary sources to shed light on the dramatic aftermath of the disaster and reveal the very personal stories of the people who pieced their lives together in its wake. By documenting the tradesmen, from apothecaries and chandlers to shoemakers and watchmakers, Butcher, Baker, Candlestick Maker tells a story of loss and resilience and illuminates how the city we know today rose from the ashes. Beautifully illustrated with exquisite fabrics, candle snuffers and other fascinating images associated with the trades of the time, we are treated to a visual feast, an evocative reminder of life before and after the Great Fire.

Who was Inspector Frederick Abberline, the lead detective in the Jack the Ripper case? Why did he and his fellow policemen fail to catch the most notorious serial killer of Victorian England? What was he like as a man, as a professional policeman, one of the best detectives of his generation? And how did he investigate the sequence of squalid, bloody murders that repelled and fascinated contemporaries and has been the subject of keen controversy ever since? Here at last in M.J. Trows compelling biography of this pre-eminent Victorian policeman are the answers to these intriguing questions. Abberlines story gives us insight into his remarkable career, into the routines of Victorian policing, and into the Ripper case as it was seen by the best police minds of the day.

This volume brings together a selection of important contributions hitherto only accessible in a large number of scattered periodicals. These articles have been selected to present a considered sequence and are preceded by an introduction which puts the story of the industrialization of Wales into perspective.

What are the relations between feminism and history, feminist politics and historical practice? What are the connections between gender and class? What part have racial identities and ethnic difference played in the construction of Englishness? Through a series of provocative and richly detailed essays, Catherine Hall explores these questions. She argues that feminism has opened up vital new questions for history and transformed familiar historical narratives. Class can no longer be understood outside of gender, or gender outside of class. But English identities have also been rooted in imperial power. *White, Male and Middle Class* explores the

The Fall of the Governor Part One by Robert Kirkman and Jay Bonansinga is the third novel in the New York Times bestselling series based on the award-winning comic books and blockbuster television show. Über-villain Phillip Blake has come a long way. He journeyed from humble beginnings into the dark heart of the zombie apocalypse. And here, he has manoeuvred to become a small town's self-proclaimed leader. But Woodbury's residents (those who survive) will live to regret the day Blake, aka the Governor, darkened their doors. For the Governor runs a twisted, violent dictatorship

within Woodbury's ever-tightening barricades. Those that manage to breach those barricades find only misery within, and the terror of the zombie menace without. The Governor's complex story continues in a tour de force of action and horror. Iconic characters from the comic book, including Rick, Michonne, and Glenn, make their entrance onto this nightmarish stage, and fans of 'The Walking Dead' will see these characters in a whole new light.

Consumption studies has grown tremendously in the past decade. Researchers in sociology, geography, anthropology, history, marketing, management, organization and even art history have embraced consumption as a key institution of our era, and are eager for ideas and insights. *Conversations on Consumption* makes an important contribution to the growing field of consumption studies by offering readers a lively introduction to debates and dialogues that have shaped the field, in the form of engaging interviews and personal reflections from leading theorists and researchers. The interviews in this collection were first published in the interdisciplinary journal *Consumption Markets and Culture* and together form an accessible summary of the leading ideas and key developments in consumption studies and social theory over the past two decades. With innovative contributions from marketing academics, historians, consumer researchers, sociologists, anthropologists and artists, the pieces highlight the interdisciplinary nature of consumption, as well as the wide-ranging interest in consumption studies. They are united in their approach to understand consumption, far removed from economic or managerial analysis, by focusing more on the role it plays in culture. *Conversations on Consumption* will be of interest to scholars and students of sociology, anthropology, consumer research, management studies, and history.

Out of necessity in frankly covering a murky subject like pornography, this book may occasionally have language that could be offensive to some people. The book explores pornography in a social context that originated with the first clothing and the first language. The exploration continues with the invention of the camera, its offering of new opportunities in pornography, and various legal and social interactions growing out of these. The author explores a hypothesis that interest in pornography has its roots in a debaucher-debauchee dichotomy

beginning with civilization, and this generates the spectator fascination, commercial customers, pornography creators, and porno models themselves. Touches on the history of pornography, legal issues raised by pornography, and descriptions of aspects of pornography should enlighten readers to an enormous and real cultural phenomenon lurking below the surface of our contemporary civilization and not without its effects on everyone. At the beginning of each decade for 200 years the national census has presented a self-portrait of the British Isles. The census has surveyed Britain from the Napoleonic wars to the age of the internet, through the agricultural and industrial revolutions, possession of the biggest empire on earth and the devastation of the 20th century's two world wars. In *The Butcher, the Baker, the Candlestick Maker*, Roger Hutchinson looks at every census between the first in 1801 and the latest in 2011. He uses this much-loved resource of family historians to paint a vivid picture of a society experiencing unprecedented changes. Hutchinson explores the controversial creation of the British census. He follows its development from a head-count of the population conducted by clerks with quill pens, to a computerised survey which is designed to discover 'the address, place of birth, religion, marital status, ability to speak English and self-perceived national identity of every twenty-seven-year-old Welsh-
