There are many book studies of particular books of the Bible. There is also a myriad of devotional and inspirational books regarding the Bible, and many questions about it. Why are there different accounts of some events? Why is the description of the earth and the world different from what we know today? Many of these questions—and others—are answered when a person learns how the Bible was put together. This book does not deal with theology or doctrine. It is an account of how the various parts of the Bible came to be included. Further, the book traces the journey of the Bible from its initial collections to Jerome and continues until its publication in the English language, in both the Protestant and the Catholic versions. The author has written this book for the eager layman and woman and also for the first-year college or Bible school student who is in a religious studies program.

This study guide is the academic companion to Brian Connolly's "Wolf Journal." Set in the Allegheny Mountains of northern Pennsylvania, farm boy Jimmy Warren finds wolf tracks in the snow - even though no wolves have been in these woods for a hundred years. The tracks lead him deeper into his passion for nature guided by Hawk, an old Susquehannock storyteller. Along the way, Jimmy falls in love with the beautiful Sherry Woolman who shares his love of the wild. As a school project, Jimmy keeps a journal on wolves. In order to protect the wolf he discovered, Jimmy writes about him as if he is fiction. The Tanner brothers, a derelict pair of would-be bounty hunters, threaten to destroy the perfect balance of nature that Jimmy has found. "Wolf Journal" is a journey into the natural world where intricate details, like the imprint of a wing in snow, tell a larger story - one of endangered species, an endangered planet, and the human spirit that strives to understand and protect.
