"The United States Code is the official codification of the general and permanent laws of the United States of America. The Code was first published in 1926, and a new edition of the code has been published every six years since 1934. The 2012 edition of the Code incorporates laws enacted through the One Hundred Twelfth Congress, Second Session, the last of which was signed by the President on January 15, 2013. It does not include laws of the One Hundred Thirteenth Congress, First Session, enacted between January 2, 2013, the date it convened, and January 15, 2013. By statutory authority this edition may be cited "U.S.C. 2012 ed." As adopted in 1926, the Code established prima facie the general and permanent laws of the United States. The underlying statutes reprinted in the Code remained in effect and controlled over the Code in case of any discrepancy. In 1947, Congress began enacting individual titles of the Code into positive law. When a title is enacted into positive law, the underlying statutes are repealed and the title then becomes legal evidence of the law. Currently, 26 of the 51 titles in the Code have been so enacted. These are identified in the table of titles near the beginning of each volume. The Law Revision Counsel of the House of Representatives continues to prepare legislation pursuant to 2 U.S.C. 285b to enact the remainder of the Code, on a title-by-title basis, into positive law. The 2012 edition of the Code was prepared and published under the supervision of Ralph V. Seep, Law Revision Counsel. Grateful acknowledgment is made of the contributions by all who helped in this work, particularly the staffs of the Office of the Law Revision Counsel and the Government Printing Office"--Preface.

American Philosophy offers the first historically framed introduction to the tradition of American philosophy and its contemporary engagement with the world. Born out of the social and political turmoil of the Civil War, American philosophy was a means of dealing with conflict and change. In the turbulence of the 21st century, this remains as relevant as ever. Placing the work of present-day American philosophers in the context of a history of resistance, through a philosophical tradition marked by a commitment to pluralism, fallibilism and liberation, this book tells the story of a philosophy shaped by major events that call for reflection and illustrates the ways in which philosophy is relevant to lived experience. This book presents a survey of the historical development of American philosophy, as well as coverage of key contemporary issues in America including race theory, feminism, indigenous peoples, and environmentalism and is the ideal introduction to the work of the major American thinkers, past and present, and the sheer breadth of their ideas and influence.

Saved by Song returns to print with its sweeping overview of the history of gospel music. Powerful and incisive, the book traces contemporary Christianity and Christian music to the sixteenth century and the Protestant Reformation after examining music in the Bible and early church. In America, gospel music has been divided between white and black gospel. Within these divisions are further divisions: southern gospel, contemporary Christian music, spirituals, and hymns. Don Cusic has provided background and insight into the developments of all these rich facets of gospel music. From the psalms of the early Puritans through the hymns of Isaac Watts and the social activism of the Wesleys, to the camp meeting songs of the Kentucky Revival, the spirituals that came from the slave culture, and the hymns from the great revival after the Civil War, gospel music advanced through the nineteenth century. The twentieth century brought the technologies of recordings and the electronic media to gospel music. Saved by Song is ultimately the definitive and complete history of a uniquely American art form. It is a must for anyone interested in the musical and spiritual life of a nation.

Historically, when sweeping policy changes or legislation of indelible consequence are signed into law, Presidents receive the credit. There is a good reason for that. Without the Chief Executive putting his pen to paper, these advancements would have nary a chance of becoming reality. In most cases, though, a Presidents signature is simply the culmination of a long fight to make an idea or actual proposal a reality. In fact, quite often it is members of Congress who nurture proposals from inception to the Presidents desk. Like a train leaving its first station, the legislative process often starts with a handful of people on board until slowly, a few more passengers hop on at each stop and before long, there is a full car with people standing in the aisles. Often times, a bill becoming a law is no different.

In The Roots of Goodness and Resistance to Evil, Ervin Staub draws on his extensive experience in scholarship and intervention in real-world settings to illuminate the socializing experiences, education, and training that lead children and adults to become caring people and active bystanders who help others, and act to prevent violence and create caring societies. The book offers an excellent balance of Staub's important and influential recent articles and essays in the field and newly written chapters. It explores why we should help and not harm others. It offers wide-ranging examples and research about the roots of everyday helping and heroism, rescue in the Holocaust and elsewhere, overcoming trauma to become altruists, reconciliation in Rwanda and other ways of resisting evil, and more. Staub engages with ways to promote active bystandership in the service of preventing violence, helping people to heal from violence, and building caring societies. He explores the range of experiences that lead to active bystandership, including socialization by parents, teachers (and peers) in childhood, education, experiential learning, and public education through media. He examines what personal characteristics or dispositions result from such experiences, which in turn lead to caring and helping. Staub also considers how circumstances influence people--both individuals and whole groups--and how they join with personal dispositions to determine whether people remain passive in the face of others' need or instead help others and behave in morally courageous or even heroic ways. He considers how moral and caring values can be subverted by circumstances, and outlines ways to resist that possibility. He also considers how past victimization and the resulting psychological woundedness, which can lead to "defensive violence" or hostility toward people and the world, may be transformed by other experiences, leading to "altruism born of suffering." The book draws on research and theory as well as work in applied settings. Ultimately this book will help readers explore how we can turn ourselves into active, helpful people and what we need to do to create peaceful and caring societies.
