Written in an easy to follow, step-by-step manner, *Skills I Wish I Learned in School: Building a Research Paper* is a fantastic resource for new college students who need a frame of reference for how to research and write a college-level paper.

Introductory and capstone experiences in the undergraduate psychology program are crucial ways to engage students in their major and psychology department, impart realistic expectations, and prepare them for life beyond college. Providing the right orientation and capstone courses in psychology education is increasingly a concern of instructors, department chairs, program directors, and deans, and both types of courses have become important sources for gathering pre- and post-coursework assessment data for degree learning outcomes. The strategies presented here have been designed to help educators examine issues around teaching the introductory or careers course and developing a psychology-specific orientation program. The authors also provide concrete suggestions for building capstone experiences designed to fit the needs of a department, its pedagogical philosophy, or the educational agenda of the college or university. Undergraduate psychology curriculum designers and instructors can benefit from learning innovative and effective strategies for introducing the major to first-year students and, at graduation, for bringing closure, reinforcing the overall departmental learning outcomes, and helping students apply their disciplinary knowledge in capstone experiences and post-graduate life. In this collection of articles, psychology instructors involved in the improvement of teaching and learning review the research and share their own successes and challenges in the classroom. Discussions include effective practices for helping students become acclimated to and engaged in the psychology major, application of developmental knowledge and learning communities to course design, and use of quality benchmarks to improve introductory and capstone courses. Other chapters describe innovations in the design of stand-alone courses and offer concrete advice on

counseling psychology graduates about how to use what they have learned beyond their higher education experiences. WRITING THE RESEARCH PAPER'now with access to InfoTrac College Edition'is an easily accessible research guide that can be used by students throughout their college career and beyond.

Published in partnership with NACADA: The Global Community for Academic Advising Academic advisors help students learn to make the most of their college years, not merely by completing requirements toward a degree but also by growing intellectually and developing all aspects of their identity. Yet, many professional and faculty advisors are new to academic advising and may feel ill-equipped to do more than help students register for classes. This new edited collection provides an overview of the theory and best practice undergirding advising today while exploring the transition challenges of a wide-range of first-year college students, including those attending two-year colleges, coming from underrepresented backgrounds, entering underprepared for college-level work, and/or experiencing academic failure. The purpose of this book is to assist post-traditional students to achieve success in the Occupational, Workforce, and Leadership Studies (OWLS) Department and develop their individualized pathway to earn the interdisciplinary Bachelor of Applied Arts and Sciences (BAAS) degree at Texas State University. Applied baccalaureate degrees incorporate higher-order thinking skills and advanced technical knowledge and skills with applied coursework. BAAS students may also earn college-level credits through prior learning assessment (PLA), evaluating and credentialing knowledge and

skills gained outside the classroom. The organization and content of this book provides adult degree program faculty and leaders an example of how one required textbook develops and supports the outcomes and activities in all the core courses of an interdisciplinary degree program designed for post-traditional adult learners. The majority of the students earning the BAAS degree are post-traditional students. They are often defined with some or all of these characteristics: over age 25 years old when starting or returning to college, may not have a traditional high school diploma, enroll part-time, work full-time, are financially independent, have dependents other than a spouse and may be a single parent. These students juggle multiple roles and responsibilities in the family, workplace, and community. Post-traditional students bring rich work/life experiences, may be experiencing personal and/or professional transitions, have clear career goals, and often finance their education. They seek flexible programs including online education, PLA, and accelerated course formats. Thus, post-traditional students want active, collaborative, and interactive learning relevant to career and other roles and goals.

Designed for less advanced writers than Turabian's *Manual of Writers of Research Papers, Theses, and Dissertations*, Seventh Edition, Gregory G. Colomb and Joseph M. Williams here introduce students to the art of defining a topic, doing high-quality research with limited resources, and writing an engaging and solid college paper. The *Student's Guide* is organized into three sections that lead students through the process of developing and revising a paper. Part 1, "Writing Your Paper," guides students through the research process with discussions of choosing and developing a topic, validating sources, planning arguments, writing drafts, avoiding plagiarism, and presenting evidence in tables and figures. Part 2, "Citing Sources," begins with a succinct introduction to why citation is important and includes sections on the three major styles students might encounter in their work—Chicago, MLA, and APA—all with full coverage of electronic source citation. Part 3, "Style," covers all matters of style important to writers of college papers, from punctuation to spelling to presenting titles, names, and numbers. Paula Porter has been writing since the seventh grade, when Mr. Kirk named her editor of the Minden, Iowa, Junior High Newspaper. She has an AA in Journalism from Iowa Western Community College, a BA in Journalism from the University of Nebraska at Omaha, a BA in Elementary Education from Buena Vista University, a MA in English Creative Writing from Iowa State University, and is completing her dissertation for a Ph.D. in Instructional Design for Online Learning from Capella University. Porter is a published poet and essayist, as well as a technical editor and Internet senior editor. When not teaching in the classroom or online at several colleges, Porter can be found cleaning stalls and tack or riding her horses, Odie and Tucker. Writing a research paper is easy, once students understand the process. The focus of this text is to help students learn, not only how to format an APA research paper, but how to "research smart, not hard." Not only does this book provide step-by-step instructions in creating APA templates for Microsoft Word 2003 and 2007, but helps students avoid intimidation by citations and references once they learn the mnemonics for both. By following a few simple steps, the dreaded research paper can be tamed. After teaching freshman English for sixteen years, I was delighted to use Paula Porter's 7 Steps to Researching and Writing an APA-formatted Research Paper for my Composition I and II classes. This book provides instruction in database and Internet research, as well as all the stages of the writing process, the most daunting task for college writers. Porter has combined higher level thinking skills of analysis, synthesis and evaluation with well-explained strategies in steps that lead to success for those who follow them. Dr. Diane Strauser Alvarez Porter has broken down a dense set of information into carefully constructed units designed to facilitate students' easy application of the requirements for APA format and essay writing. Her concise and methodical approach to the material is a boon for any writing course, and her approach utilizes her experience both as a student required to write in this citation style and as an instructor who has encountered the front lines with her students. Simple in its diction, it is not simplistic in what it affords for student success. AnneMarie Fowler, English and Literature Faculty

It is part of a series of books on this topic that will span criminal justice, policing, corrections, and research methods.
