Worldwide Destinations: The Geography of Travel and Tourism is a unique text that explores tourism demand, supply, organisation and resources for every country worldwide. The eighth edition is brought up to date with features such as: An exploration of current issues such as climate change, overtourism, expedition cruises, film tourism, economic and cultural impacts of tourism. New and updated case studies throughout. More emphasis on South-east Asia, Africa and the Middle East. Online resources for lecturers and students including PPTs, web links, video links and meditations on the evolving implications of COVID-19 for tourism. The first part of the book comprises thematic chapters which detail the geographic knowledge and principles required to analyse the tourism appeal of destinations. The subsequent division of the book into regional chapters enables the student to carry out a systematic analysis of a particular destination, by providing insights on cultural characteristics as well as information on specific places. Worldwide Destinations: The Geography of Travel and Tourism is an invaluable resource for studying every destination in the world, by explaining tourism demand, evaluating the many types of tourist attractions and examining the trends that may shape the future geography of tourism. This thorough guide is a must-have for any student undertaking a course in travel and tourism.

overtourism. Yet there is no question that travel will resume; the only question is, when it does, what will it look like? *Overtourism: Lessons for a Better Future* charts a path toward tourism that is not only sustainable but regenerative for the places we love and the people who live there. This practical book examines the causes and effects of overtourism before turning to emerging management strategies. Visitor education, traffic planning, and redirection to lesser known sites are among the measures that can protect the economic benefit of tourism without overwhelming local communities. As tourism revives around the world, these innovations will guide government agencies, parks officials, site managers, civic groups, environmental NGOs, tourism operators, and others with a stake in protecting our most iconic places.

Tourism: the good, the bad and the ugly. As one of the biggest industries in the world, tourism contributed ten percent of the world's GDP before the pandemic brought it to an historic standstill. Hailed as a smokeless industry, it was seen as a tool for development by serving as an income and job creator. The industry was expanding in oftentimes uncontrolled forms, reaching over one billion international travelers before the virus halted all travel. This edited volume highlights the issues the industry faces, including impacts on the environment, culture, and residents. As the industry rebounds post-pandemic, this book gives space to imagine a more equitable and ethical industry. Bringing together expert authors from around the world, contributions highlight possible ways the industry can be developed more

beneficially for people and planet. From nature-based tourism in Africa which protects natural resources by involving local communities and offering cultural interpretation; to vernacular design of tourism buildings and ecolodges that honors and celebrates the local; to considering ways in which cruise ship tourism can offer meaningful encounters instead of contributing to overtourism; to taking a hard look at volunteer tourism and the ways in which it inadvertently prioritizes profit and traveler needs over the needs of local communities, and how it can be developed more ethically; to examining tourism as a tool to increase interculturalism and intercultural understanding; and to the sensitive issue of ethnic tourism to discover one's roots and identify and aid in community development. This book celebrates the ways in which tourism brings us together and can add to our personal and planetary well-being by consciously choosing the ways we travel and how we develop travel opportunities.

The 2020 edition analyses tourism performance and policy trends across 51 OECD countries and partner economies. It highlights the need for coherent and comprehensive approaches to tourism policy making, and the significance of the tourism economy, with data covering domestic, inbound and outbound tourism, enterprises and employment, and internal tourism consumption.

crucial contemporary themes such as overtourism, urbanization and administrative challenges, world heritage, smart cities and the use of technologies such as VR in urban tourism experience creation. It will be a vital resource for upper-level students, researchers, and academics in tourism, city tourism, Asian studies, development studies, cultural studies, and sustainability, as well as professionals in the field of tourism management.

Tourism, as with many parts of the economy, is at a pause-reflect-rest stage in the post pandemic world. This book puts forward some positive and practical concepts for the reset stage in terms of pushing towards wholly sustainable tourism. The COVID-19 pandemic has been disastrous in terms of the loss of human life, the physical and mental strains placed on large numbers of populations across the globe who have been quarantined in their homes and in terms of the costs of dealing with the pandemic and supporting business and citizens through the period. Tourism has been comprehensively damaged, not only in advanced economies, but also in poorer developing economies where tourism provides a vital source of income and employment. The problem has been complicated by the shattering effect on mass tourism, which has been far more sensitive to the shutdown of travel and accommodation than ethical and responsible tourism activities focused at a local sustainable level. Therefore this book evaluates how the pandemic and economic decline affects ethical and responsible tourism - the type of tourism which sustains and develops local communities in a balanced way for the benefit of future generations. It reflects on the position the authors established in "Ethical & Responsible Tourism - managing sustainability in local tourism destinations" and then determines how ethically and responsibly focused tourism may adapt, develop and maintain safety for consumers in the post-virus world. This

This book presents strategies and models for cultural heritage enhancement from a multidisciplinary perspective. It discusses identifying historical, current and possible future models for the revival and enhancement of cultural heritage, taking into consideration three factors – respect for the inherited, contemporary and sustainable future development. The goal of the research is to contribute to the enhancement of past cultural heritage renovation and enhancement methods, improve the methods of spatial protection of heritage and contribute to the development of the local community through the use of cultural, and in particular, architectural heritage. Cultural heritage is perceived primarily through conservation, but that comes with limitations. If heritage is perceived and experienced solely through conservation, it becomes a static object. It needs to be made an active subject, which implies life in heritage as well as new purposes and new life for abandoned heritage. Heritage can be considered as a resource that generates revenue for itself and for the sustainability of the local community. To achieve this, it should be developed in accordance with contemporary

needs and technological achievements, but on scientifically based and professional criteria and on sustainable models.

The research presented in this book is based on the approach of Heritage Urbanism in a combination of experiments (case studies) and theory.

Cultural Sustainability, Tourism and Development considers how tourism provides a lens to examine issues of cultural sustainability and change. It discusses how cultural and natural assets, artistic interventions, place identity, policy strategies, and community well-being are intertwined in (re)articulations of place and local dynamics that occur in tourist locations. With a primary focus on culture in sustainable development, the book clarifies connections between culture as a core dimension of local sustainability and cultural dimensions of sustainable tourism. It highlights the roles and place of cultural expression, artistic activity, and heritage resources in local or regional sustainable development contexts. Chapters critically examine the dimensions of tourism-invoked dynamics of change and the cultural impacts of tourism-related activities. The book concludes with proposals for new culture-informed and creativity-based approaches, mediations, and relations to encourage a better balance between visitors and residents' quality of life and the broader sustainability of the area. Interdisciplinary and international in scope, contributions reflect on communities and rural areas located in Brazil, Canada, Croatia, India, Italy, Japan, the Netherlands, Poland, Portugal, and the United States. This book will be of great interest to students and scholars of cultural development and policy, heritage studies, cultural tourism and sustainable tourism, cultural geography, and regional development. Ethical and Responsible Tourism explains the methods and practices used to manage the environmental impact of tourism on local communities and destinations. The three core themes of the book – destination management, environmental and social aspects of ethical sustainable development and business impacts – are discussed across both topic and case study chapters, alongside explanatory editorial analysis with all chapters clearly signposted and interlinked. The case studies address specific and practical examples from a global range of examples including sites in Australia, Central America, Europe Union countries, Japan, North America and South America. Used as a core textbook, the linking of theory in the topic chapters, and practice gained through case studies, alongside further reading and editorial commentary, Ethical and Responsible Tourism provides a detailed and comprehensive learning experience. Specific case studies can be used as standalone examples as part of

This book explores the lessons learned from half a century of Caribbean cruise tourism; one of the most popular and profitable sectors of the tourism industry. The modern-day cruise industry dates from the 1960s when the three major cruise lines, Carnival, Royal Caribbean, and Norwegian, set up shop in Florida and began selling winter cruises to the Caribbean targeting American retirees. For geopolitical reasons, the US initially excluded cruises to Cuba. This changed in 2016, following the historic Obama-Castro agreement to move towards diplomatic, trade and travel normalization. Cuba quickly became the Caribbean's fastest growing cruise destination. This book considers the limited economic benefits of cruise tourism, its environmental and social impacts, and the effects of climate change, and "overtourism." Based on this analysis and case studies of key Caribbean and Mediterranean destinations, this book cautions against overdependence on cruise tourism and outlines reforms needed to bring more benefits and equity to Caribbean countries. It will be valuable to professionals, businesses, development agencies, NGOs, and academics interested in a sustainable cruise industry and the economic well-being of Caribbean island nations.

deals with the question to what extent the Croatian port city of Dubrovnik is affected by overtourism and how this can be interpreted and mitigated.

Overtourism is a multifaceted phenomenon that is very much on the agenda of the tourism industry today. At the International Tourism Fair in Berlin in 2018, as well as in numerous newspaper articles, but also in general language use, the subject of overtourism is omnipresent. Due to the worldwide increase in travel behavior and the growing popularity of city tourism, urban areas are becoming increasingly congested. These include overcrowded streets and alleys, public places, accommodation facilities and numerous other facilities. This often has negative social, economic and ecological effects. More and more often, headlines of disgruntled inhabitants, socio-cultural conflicts, infrastructural problems, as well as other grievances can be found in the media. In many cases, these are due to even more rapidly increasing numbers of tourists.

This open access book is based on work from the COST Action RESTORE - REthinking Sustainability TOwards a Regenerative Economy, and highlights how sustainability in buildings, facilities and urban governance is crucial for a future that is socially just, ecologically restorative, and economically viable, for Europe and the whole planet. In light of the search for fair solutions to the climate crisis, the authors outline the urgency for the built environment sector

to implement adaptation and mitigation strategies, as well as a just transition. As shown in the chapters, this can be done by applying a broader framework that enriches places, people, ecology, culture, and climate, at the core of the design task - with a particular emphasis on the benefits towards health and resilient business practices. This book is one step on the way to a paradigm shift towards restorative sustainability for new and existing buildings. The authors want to promote forward thinking and multidisciplinary knowledge, leading to solutions that celebrate the richness of design creativity. In this vision, cities of the future will enhance users' experience, health and wellbeing inside and outside of buildings, while reconciling anthropic ecosystems and nature. A valuable resource for scientists and students in environmental sciences and architecture, as well as policy makers, practitioners and investors in urban and regional development.

The first text to take a truly inter-disciplinary approach to critically examining the impacts of tourism on marine environments and coastal regions, focusing on the negative environmental impacts but also looking at the social and economic impacts.

The growth and increased popularity of cruises is accompanied by a number of sustainability issues concerning the environment, the port economies and societies; on board and at shore. The sustainability imperative ultimately leads to operational, economical as well as image-related challenges for the sector's decision-makers and stakeholders. This collection of peer-reviewed papers, presented during the 3rd International Cruise Conference (Dubrovnik, Croatia), seeks to address those issues and contribute to their management in the mid-term.
