reference source for researchers, students, and professionals seeking current developments in novel approaches to public policy studies. This publication features timely, research-based chapters on the critical issues of public policy including, but not limited to, archival paradigms, Internet censorship, media control, civic engagement, virtual public spaces, online activism, higher education, and public-private partnerships.

This book introduces the concepts surrounding media relations and explains current media and communications practices, from both theoretical and practical perspectives. (Midwest).

Henry Darwin Rogers is a familiar figure in the history of American geology, especially as the director of the first state geological surveys of New Jersey and Pennsylvania. Although best remembered for the survey work, Rogers considered his theory of mountain elevation to be his most important scientific legacy. Based on studies of the Appalachian Mountains, Rogers's elevation theory was the first American explanation of the dynamics of elevation. As a study of the Pennsylvania survey, this volume offers new insight into the origin and problems associated with early surveys. As a study of Rogers's life and work, it presents a portrait of a man with strong convictions and dedication and examines the development and application of his ideas.

The scoop book: Reviews and Editorial articles. It is furnished or provided with varieties of compiled subject's content; it is the foremost of its type, its informative, educative, professionally alright, it is interesting and intriguing. They are a compiled works by different writers with a motive; bound to salvage readers, to bring them out of the gloom into the lime

light, and to the other side of the channel which is gloom-less.

To test whether the writing style in "up-market" English language newspaper editorials has become less formal over the past century as in many other genres, Westin studied language trends in three major British papers. After overviewing previous research on newspaper language, the author discusses methodological issues in using machine-readable corpora for analyzing linguistic change over time, and her multi-feature/multi-dimensional approach extending Biber's work on markers of personal involvement to include narrative and other forms of discourse. Charted results reveal both linguistic change and continuity. Appends the frequency counts for each of the study's linguistic features. Lacks an index. It is unclear whether Westin is currently affiliated with Uppsala U. or U. College of Gavle, Sweden.
