"Nurse as Educator: Principles of Teaching and Learning for Nursing Practice, Sixth Edition prepares nurse educators, clinical nurse specialists, and nurse practitioners and students for their ever-increasing role in patient teaching, health education, and health promotion. One of the most outstanding and unique features of this text is that it focuses on multiple audiences therefore making it applicable to both undergraduate and graduate nursing courses. The Sixth Edition features coverage of relevant topics in nursing education and health promotion such as health literacy, teaching people with disabilities, the impact of gender and socioeconomics on learning, technology for teaching and learning, and the ethical, legal, and economic foundations of the educational process"--

Recommended for purchase in Nursing Outlook, official journal of the American Academy of Nursing. This book provides the nurse with an up-to-date, complete, and practical guide to planning, implementing, documenting, and evaluating patient education to ensure its effectiveness and appropriateness.

Mastering Patient and Family Education presents a model that moves PFE to a central part of a health system. Author Lori C. Marshall will guide readers through every step of the process—from building a strong foundation for self-care management, to maximizing knowledge transfers through tools and technology, to establishing a health system approach for patient and family education. Using the tools and resources in this book, nurses and healthcare professionals can better educate patients so they can actively participate in their treatment and ultimately improve outcomes. Coverage includes: interprofessional education strategies, simulation and telehealth for patient education, augmentative and assistive communication needs, documentation processes and systems, creation of a PFE department, measurements and outcomes.

Effective Patient Education helps health professionals and students develop the skills and knowledge to conduct effective patient education in a highly efficient way. It

emphasizes a team approach to patient education, recognizing that, because of the complexity of health care, many health professionals are involved in patient care. This book is therefore written for nurses, physicians, physical therapists, dietitians, pharmacists, and other health care professionals who share responsibility to guide their patients in enhancing and maintaining health and well-being. Effective patient education is a way of communicating that fosters a partnership between the patient and health professional. It involves more than giving information and instruction. In order to conduct effective patient education, health professionals must recognize that individual patient variables influence the degree to which a patient will follow health advice. The health professional can assess the patient's preexisting beliefs and attitudes, fears and anxieties, and individual life and family circumstances in order to communicate health recommendations in accordance with individual patient needs.

Much more than simply recording events, pedagogical documentation is a revolutionary educational approach that enables practitioners to capture and understand the ways in which children learn and think. Exploring the use of pedagogic documentation across five different cultures, this book offers a unique insight into the conditions and methods through which pedagogical documentation might become an effective means of connecting teaching and learning. By drawing on theory, research-based evidence and practice, *Understanding Pedagogic Documentation in Early Childhood Education* reveals pedagogic documentation as an instigator for critical reflection on practice, for the creation of new pedagogical approaches and improvements in quality. Observing and documenting the lived educational experience of children and practitioners is emphasised as a means of acknowledging their voice and rights, of revealing their knowledge, their competences, their attitudes and dispositions to learning. Offering contextualised approaches and considering the challenges involved in observing and documenting day-to-day practice in early childhood settings, chapters encourage professionals to reflect and recognise the value of documentation for children, staff members and the wider community. Making a crucial contribution to the debates on pedagogical documentation, *Understanding Pedagogic Documentation in Early Childhood Education* offers researchers, students, policy-makers and professionals a comprehensive, and multicultural perspective on pedagogical documentation.

This reference text comprehensively addresses every aspect of infusion therapy. The new second edition now includes discussion of intrathecal, intraosseous, and epidural procedures, as well as coverage of subcutaneous pain management, conscious sedation, and the use of catheters not being inserted intravenously. Addressing every aspect of infusion therapy, this text can be applied to any healthcare setting. **INFUSION THERAPY IN CLINICAL PRACTICE** also covers management, quality assurance, entrepreneurial roles, and future considerations for infusion therapy. Each chapter can stand alone, making it a great reference tool for practitioners. Author is the Intravenous Nurses Society, a highly-respected nursing organization that is the authority in the field. All four chief editors are experienced intravenous nurses, some in both research and clinical practice. Over 30 expert contributors have participated in this text, ensuring that content is current, accurate, and pertinent to today's infusion therapist. Chapter 19, Intravenous Therapy Calculations covers formulas, their uses, and sample calculations, addressing all the basics a novice practitioner needs, and providing a comprehensive refresher for the experienced practitioner. An entire unit in the book explores the unique challenges presented by infusion therapy in alternative settings, including home care. Extensive coverage of specialties like oncology, pain management, blood components, and parenteral nutrition make this text a great resource for the practicing nurse who needs detailed information on these important topics. Extensive coverage of pharmacologic and other agents provide valuable up-to-date information on the agents used in infusion therapy. Extensive coverage of infusion therapy equipment, from purchasing equipment to using it and maintaining it, provides the nurse with practical information on the equipment used in infusion therapy. This text covers all nine core areas of INS certification (technical and clinical, fluid and electrolytes, pharmacology, infection control, transfusion therapy, oncology, pediatrics, total parenteral nutrition, and quality assurance), making it a great resource for review and study for certification. Where appropriate, the text offers tips for patient education, helping experienced nurses find new approaches, and providing new nurses with a framework of patient strategies to work from. Every chapter begins with a brief chapter outline to enable the reader to immediately assess the content and scope of the chapter. Throughout the text key information is presented in easy to read tables, boxes and bulleted lists to save readers time and to pull important information together in a single place. Nursing diagnoses and patient outcomes are included in chapters to provide quick, complete information on clinical application. Basic material is addressed first and organized to facilitate learning for a new practitioner. Advanced and supplemental chapters are located later in the text, to be addressed as the student knows and understands the more basic material. Each chapter stands alone providing a brief mini-review and refresher for busy professionals. The Case Management chapter covers care and cost management, the health care system, and the IV nurses role as part of the health care team. The Conscious Sedation chapter presents all of the basic information: what it is, how it is used, what agents are used, patient selection, and expected outcomes and more! The IV Therapy in Radiology chapter covers the broadening role of infusion therapy in radiology and the role of the IV nurse within this specialized sector. The Management of Hazardous Materials chapter offers a complete and thorough discussion of hazardous material issues pertinent to infusion therapy, including a discussion of infusion therapy agents and disposal. The Entrepreneurial Roles in IV Therapy chapter examines how nurses can become more involved as entrepreneurs, especially in infusion therapy. Step-by-

Step Nursing Skills boxes focus on key skill sequences, providing step-by-step guides to various procedures. A new design makes it easier to read and find material.

Documentation in early childhood education is typically seen as a means to enhance the quality of care and education, and as a way to take account of the child's view. *Assessment and Documentation in Early Childhood Education* considers the increasing trend towards systematic child documentation especially in early childhood institutions. The authors present ways in which assessment and evaluation is done sometimes explicitly but more often implicitly in these practices, and explore its means, aims, forms, and functions. They also examine the rationalities of child documentation from the perspective of professional practice and professionalism and suggest that documentation and assessment practices can weaken and constrain but also empower and strengthen teachers, children and parents. Topics explored include: Different forms of documentation and assessment Documentation and listening to the children Dilemmas of assessment and documentation Participation by children Involvement of parents This timely book will be appealing for those studying in the field of early childhood education, teacher education, special education, general education, social work, counselling, psychology, sociology, childhood studies, and family studies.
