There is considerable national variation in the professionalization and status of the management accountant. Although researchers from different countries have contributed to our knowledge about tasks and roles, we have limited insights into the development, education, and socio-cultural influences in different countries and surprisingly little is known about the local and national contexts in which these roles are learned and performed. This book bridges this research gap using two complementary perspectives. The first part explores management accountants in a range of different national contexts, providing information about country-specific historical developments and educational standards as well as specific roles and tasks. The second part focusses on important global developments that will increasingly impact management accountants in the future, such as sustainability, the financial crisis, technology and changing roles. By combining local context with a global overview, this insightful volume provides an agenda for future research which will be of great interest to scholars and advanced students in management accounting throughout the world.

SAP ERP modules are notoriously hard to configure and use effectively without a lot of practice and experience. The book takes a systematic approach that leads SAP Financial Accounting and Controlling (FICO) users step by step through configuring and using all the program's facets. This approach makes configuration complexities manageable. The book's author—SAP expert, trainer, and accountant Andrew Okungbowa—ensures that both you and your end users are up and running quickly and confidently with FICO. He also provides sound and tested procedures that ensure your implementation works without error. SAP ERP Financial Accounting and Controlling: Configuration and Use Management is in fact the most comprehensive and easy-to-follow SAP FICO configuration book in the market. It incorporates a hands-on approach, with hundreds of screen shots and practical examples, that allows a person without prior configuration training to make SAP FICO ready for use in the enterprise. Providing an in-depth coverage of both configuration and end user procedures, the book covers most aspects of the SAP FICO certification syllabus—SAP's view of the module's key tasks and procedures—including: Configuring and using the general ledger and accounts payable and receivable screens Configuring and completing closing procedures, asset accounting, and financial reporting Configuring global settings and enterprise variables Accounting for both profit and cost centers Creating a house bank Integrating FICO with other SAP modules Taking a jargon-free tone and providing an abundance of examples, Andrew Okungbowa provides a clear understanding of configuration techniques and the breadth of functionalities encompassed by SAP FICO. And as an accountant, Okungbowa understands the needs of end users as well as of those answering to the CIO.
