

Florida Civics Mcgraw Hill Chapter 24

The authors of these essays are an interdisciplinary team of anthropologists and historians who have combined the research methods of both fields to present a comprehensive study of their subject. Published in 1979, the book takes an ethnohistorical approach and touches on the history, anthropology, and sociology of the South as well as on Native American studies. While much has been written on the archaeology, ethnography, and early history of southern Indians before 1840, most scholarly attention has shifted to Oklahoma and western Indians after that date. In studies of the New South or of Indian adaptation after the passage of the frontier, southeastern native peoples are rarely mentioned. This collection fills that void by providing an overview history of the culture and ethnic relations of the various Indian groups that managed to escape the 1830s removal and retain their ethnic identity to the present.

Sport Funding and Finance is written for students who wish to get both a broad and deep understanding of the commercial and financial structure of sport in various contexts. To this end, the book provides students with a three-tiered learning experience. The first tier provides students with a broad appreciation of the commercial evolution of sport, and how it has managed to move from the kitchen-table model to the corporate-boardroom model, and along the way become quite a sophisticated industry from a financial viewpoint. Attention will be given to the commercial development of sport using USA and European pro-sport leagues as a benchmark. Changes in the funding arrangement of sport will be highlighted, and the different funding sources will be examined in detail. The second tier will give students a sound grounding in the principles and practice of effective financial management. Students will be introduced to basic accounting principles and practice, and then led into more complex issues of pricing, costing, financial analysis, budgeting, and financial projections. The third tier will explore future developments in sport finance and funding, and examine how they will impact on sport management knowledge and skill requirements. Within this framework, the book will provide students with two types of learning outcomes. The first outcome is knowledge based and will include the following: * a grounded understanding of the commercial evolution of sport from 1950-the present * an understanding of the different commercial phases sport goes through to reach commercial maturity * an appreciation of the major global sport events and leagues, and their financial arrangements. * an insight into the financial strengths and weaknesses of contemporary sport. The second outcome is skill-based, and by reading the book and completing the cases students will be able to: * identify the different legal structures of sport organisations and the financial implications of each structure * explain the main accounting conventions and how they impact on the financial management of sport organisations * identify the foundations of double entry bookkeeping * construct a simple set of accounts for a sport organisation * use financial ratio analysis to evaluate the financial performance of sport organisations * understand different methods of constructing budgets, and use them to control the financial operation of a sport organisation * set up models for identifying and managing costs * identify different methods for setting prices for sport goods and services, and to apply them to specific settings and events. * undertake a financial planning exercise and/or feasibility study for a sport organisation or facility * undertake a cost-benefit analysis for a sport organisation event. Therefore, students will obtain both a broad knowledge of the commercial evolution of sport and its current financial operation, AND the necessary skills for understanding and supervising the financial operations of a sport organisation. Some 13 million public-sector workers in the United States--including teachers, police and firefighters, state and municipal employees, judges, and legislators--and another six million federal and military employees participate in government pension plans. These pension systems are extraordinarily diverse in design, investment policy, and governance, and they face substantial challenges as the government-sector workforce ages and governments are asked to take on new and different tasks. Public employee pensions are in deep trouble in many countries, undermining economic policy and threatening retiree well being. What can be done to help these programs perform more

efficiently and enhance old-age security? From the Pension Research Council of the Wharton School, this volume takes stock of public pension developments in the US and Canada, highlighting challenges these financial institutions face in coming decades. The first Pension Research Council study of public pensions in a quarter of a century tackles these topics with an impressive team of international actuarial, legal, and economic experts.

Of immeasurable value to lenders, agricultural economists, and a host of agribusinesses this unique volume brings together leading farmland authorities in the United States and Canada to examine the economic determinants of land value and the consequences of change in land values. As the most basic factor of production in the agricultural enterprise, farmland dominates the agricultural balance sheet, accounting for an average of 70% of all agricultural assets. The authors of this timely book provide expert analysis and review of this subject. Using data and examples from the 2008 election, and laced with previews of 2012, this text offers an overview of the presidential election process from the earliest straw polls and fundraisers to final voter turnout and exit interviews. The coverage includes campaign strategy, the sequence of electoral events, and the issues, all from the perspective of the various actors in the election process voters, interest groups, political parties, the media, and the candidates themselves.
