Common Entrance and entrance exams at 13+ - Features a range of rigorous exam-style Geography exercises for varied practice across all topics - Familiarises pupils with the format of the questions to improve exam technique An Answer Book is also available to accompany this title.

One of the most significant developments in school education in recent years has been the development and introduction of standards, a subject of considerable controversy. This book is the result of a symposium held in Kiel, a symposium that was arranged by two leading science education groups, one at IPN (Leibniz Institute for Science Education at the University of Kiel) in Germany and the other at the University of York, UK. The seminar brought together experts from 15 countries. These countries include those that have extensive experience with the effects of standards on the educational system, on individual schools and teachers and on students. Other reports concern countries which are introducing them shortly and yet others on countries that are in the early stages of development of standards. 11 are from Europe and the others are from Australia, Israel, Taiwan and the U.S. The book is divided into three parts. In Part A, two of the organizers set the scene, describing the reasons for arranging the symposium and outlining the preparations and the work done at the meeting. Part B contains 17 reports from the 15 countries and in Part C, there are two summaries, analysing the conclusions, taken from two different vantage points. The controversies surrounding standards remain. However, this book gives a succinct and authoritative overall account of the advantages and disadvantages of their introduction taken from the experiences of many countries.

Issues for 1975 (v. 61) include the Annual report of the New York State Education Department previously issued as a separate title (call no. 370.9747/N48r)

Includes Publications received in terms of Copyright act no. 9 of 1916.

With lots of realistic practice opportunities for a variety of different exam-style questions.

This book is a comparative study of masculinity and white racial identity in Irish nationalism and Zionism. It analyses how both national movements sought to refute widespread anti-Irish or anti-Jewish stereotypes and create more prideful (and highly gendered) images of their respective nations. Drawing on English-, Irish-, and Hebrew-language archival sources, Aidan Beatty traces how male Irish nationalists sought to remake themselves as a proudly Gaelic-speaking race, rooted both in their national past as well as in the spaces and agricultural soil of Ireland. On the one hand, this was an attempt to refute contemporary British colonial notions that they were somehow a racially inferior or uncomfortably hybridised people. But this is also presented in the light of the general history of European nationalism; nationalist movements across Europe often crafted romanticised images of the nation's past and Irish nationalism was thus simultaneously European and postcolonial. It is this that makes Irish nationalism similar to Zionism, a movement that sought to create a more idealized image of the Jewish past that would disprove contemporary anti-Semitic stereotypes.

Exam Board: AQA Level & Subject: GCSE Grade 9-1 Geography First Teaching: September

2016, First Exams: June 2018 Need more exam practice? Letts will get you through your GCSE 9-1 exam. * Have a go at a complete set of tests* Questions just like the real thing* All the answers at the back

E.A. Preobrazhensky was the most famous Soviet economist of the 1920s. Including newly discovered and previously untranslated documents, Volume I of The Preobrazhensky Papers reveals his political awakening through autobiographical memoirs and extensive commentary on philosophy, world events, and Russian history, culture and politics.
