Based on an extensive review of literature, Lars R. Dzedek develops a comprehensive framework to help explain how the setting in which a foreign subsidiary operates impacts its entrepreneurial initiatives and outcomes. The author conducts an empirical investigation in 14 foreign units of two large MNCs and offers detailed case studies with rich insights into entrepreneurial subsidiary activities.

The changing dynamics in the European region and beyond, the unfolding political-economic challenges across the European Union, and the rising global power of emerging economic powers require knowledge, skills, and methodological platforms inducing strategies and operations in the new and ever-changing business landscape. Geo-Regional Competitiveness in Central and Eastern Europe, the Baltic Countries, and Russia seeks to address East Central Europe's (ECE), the Baltics', and Russia's increasingly important roles as emerging markets and competitive economic players in the European region. This premier reference work is designated for scholars, professionals, government agencies, think tanks, and other individuals, organizations, and institutions interested in gaining a deeper understanding of the geo-regional strategic business dynamics and landscape involving ECE, the Baltics, and Russia. The GLOBAL BUSINESS: An Economic, Social, and Environmental Perspective is the 2nd edition of the book titled "Foundations of International Business" published by Information Age Publishing, Inc. in 2015. We have approached the 2nd edition from a

forward looking perspective by incorporating economic, social, and environmental issues, which have strong links to stakeholders and are guided by the Triple Bottom-Line (TBL) concept. A TBL approach emphasizes the importance of Profit, People, and Planet, or PPP. The Triple Bottom Line concept is highlighted throughout each chapter. Successful Multinational Enterprises (MNEs) are increasingly linking the company's profit maximization goal (the economic or Profit maximization components) to the social well-being of the community and corporate social responsibility initiatives of the firm (the social or People components), as well as the environmental consideration of scarce resources, climate change and sustainability (the environmental or Planet component). This approach enables readers to assess global business opportunities and risks in a comprehensive and integral manner. We also have made important modifications in terms of content organization of this book, as described below.

Course names: European Business. Degrees: BABS; European BABS; Politics; Economics. The module is usually an elective except on specialised European Business degrees.
