The Congressional Record is the official record of the proceedings and debates of the United States Congress. It is published daily when Congress is in session. The Congressional Record began publication in 1873. The figure of the dictator looms large in representations of postcolonial Africa. Since the late 1970s, writers, film-makers and theorists have sought to represent the realities of dictatorship without endorsing the colonialist clichés portraying Africans as incapable of self-government. Against the heavily-politicized responses provoked by this dilemma, Bishop argues for a form of criticism that places the complexity of the reader's or spectator's experiences at the heart of its investigations. Ranging across literature, film and political theory, this study calls for a reengagement with notions - often seen as unwelcome diversions from political questions - such as referentiality, genre and aesthetics. But rather than pit 'political' approaches against formal and aesthetic procedures, the author presents new insights into the interplay of the political and the aesthetic. Cecile Bishop is a Junior Research Fellow in French at Somerville College, Oxford. This is a Guide for everyone who is studying or revising for examinations. From Dictatorship to Democracy was a pamphlet, printed and distributed by Dr Gene Sharp and based on his study, over a period of forty years, on non-violent methods of demonstration. Now in its fourth edition, it was originally handed out by the Albert Einstein Institution, and although never actively promoted, to date it has been translated into thirty-one languages. This astonishing book travelled as a photocopied pamphlet from Burma to Indonesia, Serbia and most recently Egypt, Tunisia and Syria, with dissent in China also reported. Surreptitiously handed out amongst youth uprisings the world over - how the 'how-to' guide came about and its role in the recent Arab uprisings is an extraordinary tale. Once read you'll find yourself urging others to read it and indeed want to gift it. Rising energy prices and concerns about climate change are driving us towards a new kind of economy - a low-carbon economy. What will this low-carbon economy be like, and what does your business have to do to prosper in this new business environment? Larry Reynolds shows how successful organisations are already learning to be more energy efficient, manage their carbon footprint, adapt to climate change and become truly sustainable. As well as explaining how to future-proof your organisation against possible threats, The Business Leader's Guide to the Low-carbon Economy, tells you how to make the most of the many opportunities that the low-carbon economy will bring, especially in growing profits from new products and services. It is your guide to creating an organisation that will thrive in the twenty-first century. While there are plenty of published books about 'going green', there are none which explain the low-carbon economy and how to thrive in it. This book will fill that important gap. Drawing on examples from across industries, including businesses such as Asda, BT, Cargill, Coca Cola, Co-operative Group, Eurostar, Marks and Spencer, Tesco, Tesla, Walker's Crisps, Walmart and ZipCar, Larry Reynolds shows how today's successful organisations are already benefiting from the coming low-carbon economy.

Direct na de Amerikaanse verkiezingen in november 2016 stelde historicus Timothy Snyder een lijst op van twintig aanbevelingen die van belang zijn als de democratie wordt bedreigd. Hij plaatste deze lijst op zijn Facebookpagina en het bericht ging direct viral. In Over tirannie werkt Snyder deze twintig lessen uit met concrete voorbeelden uit de geschiedenis. Hij waarschuwt ons dat wij niet wijzer zijn dan de Europeanen in de twintigste eeuw, die hun democratieën zagen zwichten voor fascisme, nazisme en communisme: bewegingen waarin één leider of één partij uitdrukking gaf aan de stem van het volk en beloofde de burgers te beschermen tegen bedreigingen van buitenaf. Ook in de huidige tijd lijkt het voortbestaan van de liberale democratie op het spel te staan. Niet eerder was de geschiedenis van de vorige eeuw zo actueel. Een voordeel is dat we kunnen leren van ervaringen uit het verleden om de opmars van tirannie te stuiten. TIMOTHY SNYDER is hoogleraar geschiedenis aan Yale University. Hij publiceerde de invloedrijke boeken Bloedlanden (2011) en Zwarte aarde (2015). In januari 2017 hield hij in Amsterdam de Nooit Meer Auschwitz-lezing.

Half a century after their deaths, the dictatorships of Stalin and Hitler still cast a long and terrible shadow over the modern world. They were the most destructive and lethal regimes in history, murdering millions. They fought the largest and costliest war in all history. Yet millions of Germans and Russians enthusiastically supported them and the values they stood for. In this first major study of the two dictatorships side-by-side Richard Overy sets out to answer the question: How was dictatorship possible? How did they function? What was the bond that tied dictator and people so powerfully together? He paints a remarkable and vivid account of the different ways in which Stalin and Hitler rose to power, and abused and dominated their people. It is a chilling analysis of powerful ideals corrupted by the vanity of ambitious and unscrupulous men.
