The first hands-on guide to building Java enterprise applications, updated and expanded to cover all of J2EE's exciting new features Java has always been great when it came to creating Web applets, but, until now, it was hardly up to the task of building high-performance applications. Increased XML support, EJB 2.0, and a new APM, Java2 Enterprise Edition (J2EE), offer developers what they need to build powerful enterprise applications. This updated and expanded edition of the popular hands-on guide shows them how. It uses the examples of two large-scale enterprise applications--complete with source code--to show readers how to use J2EE's various APIs together as well as with other technologies, such as CORBA, COM, Servlets, and Agents. The book also features substantially expanded coverage of Enterprise JavaBeans and tells how to get the most out of EJB 2.0 tools and products. Topics of special interest to Java developers include: building a Servlet search engine; creating online stores with Java Server Pages; using transactions with EJBs and JDBC to create N-Tier applications; and selecting the best middleware for your needs.

The SES job application is complex. The New SES Application breaks it down into a step-by-step process based on a popular workshop taught for over 10 years. Plus, the book has updated the SES info to help you navigate hiring reforms currently impacting the Senior Executive Service. The Department of Health and Human Services has identified Acquired Immunodeficiency Syndrome (AIDS) as the foremost public health problem in the United States. The Centers for Disease Control (CDC) report that, as of December 31, 1994, there were 441,528 documented cases of AIDS in this country, and the number is increasing. AIDS is an illness characterized by a defect in natural immunity against disease. Many more individuals are known to be infected with Human Immunodeficiency Virus (HIV) but do not have symptoms or the defining characteristics of AIDS. The incubation period for AIDS may range from 1 to 10 or more years in adults and 6 months to several years in children. Infected persons appear to be capable of transmitting infection indefinitely, even if they remain asymptomatic. In order to increase

Designing Web-Based Applications for 21st Century Writing Classrooms brings together, for the first time, a group of scholars and teachers who have been developing, on their own initiative, web-based solutions to technical and professional writing instructional problems. In industry the perennial question is whether to buy or build, but in academia, for various reasons, buy is rarely an option. Individual faculty members do not have the money to pay for software solutions, and often their interests are too local or small-scale to warrant institutional-level involvement. In addition, the design of commercial applications from vendors typically does not take into account the unique needs and considerations of teachers of writing and often reflects a design ideology quite different from theirs. This is why so many writing teachers have turned to open source solutions and, in the process of learning how to tweak them to make them more responsive to their specific needs, why so many of these teachers have developed programming and design skills. Beyond exigency, the motivation for becoming proficient at interface and database design comes from the observation that the nature of writing is changing dramatically. Text is no longer an object. It has become a place of interaction; consumers are becoming producers. And the work of technical and professional communication, indeed the work of writing teachers more generally, is becoming increasingly involved in the design and implementation of places of interaction. Words have become data; texts are becoming communities.

Lawyers and law students need to think lucidly and write clearly. Undergraduate "prelaw" students who aspire to become law students and someday lawyers can do the former by practicing the latter. If writing is like thinking, then studying writing is like studying thinking. This book is a study of legal writing and the law school admissions process, which provides candid advice on navigating the LSAC.org application process, the LSAT, and a style of writing called "FIRAAC." The FIRAAC formula can help prelaw students learn to write (think) like a law student. FIRAAC can also help law students pass "race-horse" exams and bar candidates pass the bar exam. If your goal is to go to law school, graduate, pass the bar exam, and become a lawyer who writes (thinks) lucidly and clearly, then this book is for you!
