Thus, demographic changes will modify the composition of employee workforces, while globalisation will enable employees to rapidly change their place of employment. In addition, organisations are likely to counteract skill shortages and increasing readiness of employees to leave an employer for a more profitable offer. With regard to these global developments, the work of HR management is to implement a specified form of management strategy in order to maintain experienced and valuable employees within the organisation, as well as to ensure continuing productivity. Similar to the common practiced customer relationship management aiming at establishing a stable customer base and associated higher profitability, employee retention management transfers experiences in retaining promising customers to human resource processes and therefore focuses on employees as an additional crucial element in corporate success. Basically, there is a growing consensus that the retention of employees is a key determinant of further strategic competitiveness and longterm success of a company. and debt; and people. There can be no doubt that people play a vital role in an organization or business as a resource. Having a thorough strategy, a marketable product or service, and efficient processes are all important. But all of this depends on the ability of the people within the organization to execute strategies, plans, and processes to make a business successful. Every part of the business boils down to people. And by managing people, organizations can be more profitable, lead more effectively, create brand loyalty and do better work. The human resource function of every defines their success as an organization. An organisation's HR function plays a major role in the growth of its bottom line and the success of its business strategy. The very nature of a company is in its people, and giving direction to people is what human resource management (HRM) is all about. HRM provides an organization with the best services and systems drive both profit and team synergy. Human resource management is the organizational function that manages all of the issues related to the people in an organization. That includes but is not limited to compensation, recruitment, and hiring, performance management, organization development, safety, wellness, benefits, employee motivation, communication, policy administration, and training. Human resource management is also a strategic and comprehensive approach to managing people and the workplace culture and environment. members provide the knowledge, necessary tools, training, administrative services, coaching, legal and management advice, and talent management oversight that the rest of the organization needs for successful operation. HRM staff members are partially responsible for ensuring that the organization has an overall mission, vision, and values that are shared and provide an overarching reason for employees to want to work for their organization. These elements can be inspirational and help employees feel as if they are part of something that is bigger than themselves. Additional activities sponsored by HRM can include employee and community outreach. They are frequent mentors and members of employee teams that address philanthropic giving, employee engagement activities, and events that involve employee families. Human resources management has evolved over the years, and it now usually involves contributing to a company's strategic direction and using metrics to measure efforts and demonstrate value. HRM functions are also performed by line managers who are directly responsible for the engagement, contribution, and productivity of their reporting staff members. In a fully integrated talent management system, the managers play a significant role in and take ownership of responsibility for the recruitment process. They are also responsible for the ongoing development of and retention of superior employees. HRM is moving away from traditional personnel, administration, and transactional roles, which are increasingly outsourced. The HRM function is now expected to add value to the strategic utilization of employees and to ensure that employee programs recommended

Over the last decade, human resource management has come to be viewed as the dominant paradigm within which analyses of the world of work have been located. This volume examines the nature and assesses the impact of HRM within a highly under-researched division of the service sector, namely the UK hotel industry. Common perceptions of management practices in the hotel industry typically include work intensification, high labour turnover, lack of training and poor career prospects, and casualised terms and conditions of employment. Using data from a survey of over 200 hotels, this book challenges such stereotypes by demonstrating that this part of the service sector is just as likely to have experimented with new approaches to HRM as the manufacturing industry. It suggests that primary influences on managerial decision-making in the hotel industry are no different from the primary influences affecting decision-making elsewhere, countering the argument that mainstream management theories are inapplicable within the hotel industry. Furthermore, where hotels emphasise the importance of service quality enhancement and where they introduce HRM as an integrated, mutually supporting package of practices, a strong relationship between HRM and organisational performance is proposed.

The objective of this book is to link my human resource management experiences with my perception on what the Bible demonstrates about human resource management in general. My experiences are derived from industries such as health, media, security, education, manufacturing, and the banking industry. The Scripture quoted in this book is from the Holy Bible, New International Version (NIV). In the book, I have also made a number of references to the Kenyan Labor Laws of 2007 (Employment Act 2007, the Occupational Health and Safety Act, and Labor Relations Act 2007). This book serves to enlighten employees about human resource management. Employees should learn that when a human resource practitioner does something, it is not out of malice but rather in line with the human resource policies. It is therefore the duty of the employees to adhere to the employee code of conduct and the human resource policies. Managers

in other departments will also get enlightened to embrace and support the human resource department. These managers should learn that human resource policies apply to everyone in the organization regardless of their job titles. The human resource department is just as important as any other department in any organization. Human resource practitioners are therefore to be treated with respect and dignity as a part of the larger team driving the vision of the organization. Human resource practitioners will be encouraged to learn that in my perspective, the Bible is in support of human resource management practices. The Bible also gives human resource practitioners guidelines on how to run the human resource function. The human resource practitioners should therefore demonstrate integrity and professionalism as they work in this noble profession. Students joining universities will get motivation to pursue human resource management as a career from my story in this book. This is a unique, interesting, and well-rewarding career.

Human resources management is essential for any workplace environment and is deemed most effective when a strategic focus is in place to ensure that people can facilitate that achievement of organizational goals. Prestaties van mensen hebben steeds meer invloed op de bedrijfsstrategie. Die prestaties moeten dan wel gemeten kunnen worden. Op basis van de succesvolle Balanced Scorecard hebben de auteurs van dit boek een nieuwe methodiek ontwikkeld, de HR-scorecard. Daarmee kan human resources management ingepast worden in de algemene strategie van bedrijven en kan men human resources managen als een onderdeel van het bedrijfskapitaal. Bovendien wordt het mogelijk om met de HR-scorecard een koppeling te maken tussen menselijke prestatiemeting enerzijds en meetfactoren zoals omzet- en winstcijfers anderzijds. Aan de hand van een onderzoek bij 3000 bedrijven hebben de auteurs een model ontwikkeld dat bestaat uit 7 stappen. Zij beschrijven uitgebreid de verschillende stappen met een praktische toelichting hoe deze kunnen worden geïmplementeerd in de bedrijfsvoering. 'De HR-scorecard' is daarmee een boek dat een model neerlegt voor prestatiemeting in relatie tot strategie.
