A new edition of Mottahedeh's gripping account of Islam and Politics in revolutionary Iran.

Blending social scientific theories about feminism, social movements, and culture with the specifics of the Iranian situation, this volume examines changes in the structure of patriarchy from the 1960s to the present by looking at domestic labor, employment, education, politics, culture, and sexuality. Combining personal narratives and socio-philosophical discussion, Shahidian focuses on policies that shape gender relations, primarily on the Islamic government's strategies to re-strengthen patriarchal practices. A nascent secular feminism in Iran opts for far-reaching changes in gender relations, but faces serious internal and external constraints. This book studies gender discourses in Iran as the interplay of ideologies and socio-historical conditions. Iranian gender and cultural politics have emerged through lively, often brutally fierce, battles over symbols, meanings, and practices--battles involving Islamist, reformist, and secular women activists. Such conflicts have produced a damaging dual society of public and private forums. This bifurcation yields not peaceful coexistence, but subjugation to the Islamic state's plans. Only by rejecting so-called reformist measures, which, the author contends, merely continue the subordination of women, can equality between the sexes be achieved.

The site of Hasanlu Tepe in Iran is today known mainly for its Iron Age archaeology. In this report Michael Danti has re-examined the records from excavations between 1956 and 1962 to reconstruct the sequence of occupation on the mound from the late 13th to early 14th centuries.

Looking at the political history of Iran in the modern era, this book assesses the prospects for democracy to flourish there. Arguing that democracy in Iran isn't a sudden development or a western import, it also seeks to understand why democracy failed to grow roots and lost ground to an autocratic Iranian state.

Sicker argues that Soviet imperialism in Southwest Asia, particularly in Iran, exhibits a remarkable consistency from tsarist times to the present. Directly challenging prevailing beliefs of diminished Soviet interest in Iran or the Persian Gulf, Sicker asserts that the Soviet withdrawal from Afghanistan, their history of interest in the area, and the region's growing geopolitical significance all enhance the probability of a Soviet move to bring Iran into its sphere of influence. Moreover, Sicker demonstrates Soviet goals in the area are long term and are not subject to revision as a consequence of temporary setbacks or a change in Soviet leadership.

This is an exploration of the moral and pragmatic dilemmas involved in the relationships between states in an era of change, derived from a workshop held by the Centre for International Policy Studies. The concern of those present was

to examine human rights in the contemporary world.

Richard Cottam served in the U.S. embassy in Tehran from 1956 to 1958 and was consulted by the Department of State during the 1979 hostage crisis. This book draws upon his expert personal knowledge of Iranian politics to describe the spiraling decline of U.S.-Iranian relations since the cold war and the political consequences of those years. U.S. policy, he argues, is flawed by ignorance, inertia, the tenacity of a cold war mentality, a quixotic tilt toward Iraq, and the blatant inconsistency of the Reagan administration's arms-for-hostages scheme that produced the Iran-contra scandal.

Three years after the departure of the Ayatollah Rouhallah Khomeini, Iran's political future remains uncertain. This volume explores the directions the Islamic regime and, more importantly, the Iranian society and nation are likely to take in the 1990s. The study begins with a brief historical survey of Iran's political institutions, its sociocultural traits, and its economic and military conditions, as well as its foreign policy orientation at the time of the revolution. It follows with a summary of the political, social, and economic changes the Islamic revolution introduced. These serve as benchmarks against which to measure the changes and reforms of the last three years and provide a basis for sketching the potential future directions of Iran's domestic evolution and foreign relations.

"Performing Islam" focuses on a wide spectrum of ritual activities in Iran today as a key for elucidating social, cultural and political processes, but in particular the values and beliefs underpinning gender constructions in a rapidly changing complex society.

A famous Iranian dissident calls for universal human rights and democracy based on our common humanity. Akbar Ganji, called by some "Iran's most famous dissident," was a member of the Islamic Revolutionary Guard Corps. But, troubled by the regime's repressive nature, he became an investigative journalist in the 1990s, writing for Iran's pro-democracy newspapers. Most notably, he traced the murders of dissident intellectuals to Iran's secret service. In 2000, Ganji was arrested, sentenced to six years in prison, and banned from working as a journalist. His eighty-day hunger strike during his last year in prison mobilized the international human rights community. The Road to Democracy in Iran, Ganji's first book in English, demonstrates his lifelong commitment to human rights and democracy. A passionate call for universal human rights and the right to democracy from a Muslim perspective, it lays out the goals and means of Iran's democracy movement, why women's rights trump some interpretations of Islamic law, and how the West can help promote democracy in Iran (he strongly opposes U.S. intervention) and other Islamic countries. Throughout the book Ganji argues consistently for universal rights based on our common humanity (and he believes the world's religions support that idea). But his arguments never veer into abstraction; they are rooted deeply in the realities of life in Islamic countries, and offer a clear picture of the possibilities for and obstacles to improving human rights and promoting democracy in the Muslim world. Since his release from prison in March 2006, Akbar Ganji has been traveling outside Iran, meeting with intellectuals and activists in the international human rights community. He is currently living in the United States.

Discusses the political and economic aspects of each period as well as the social and cultural milieu, and includes a timeline, brief biographical notes on key players, and a bibliographic essay.

"...a serious and insightful account of the changing role of the U.N. in the Iran-Iraq conflict...by an able diplomat who was directly involved." - Shibley Telhami "This insider's account of the revolutionary changes in the U.N. Security council...is a major contribution to understanding why the U.N. and the council are now more effective and more used...[A] well-written, important book." - U.S. Ambassador Thomas R.

Pickering "As one of the participants I am impressed by Mr. Hume's understanding and mastery of the diplomtic complexities." - Sir Crispin Tickell In 1985, faced with conflicts involving Iran and Iraq, the United Nations Security Council's permanent members joined forces for the first time to mobilize the U.N. against threats to international peace and security. Cameron R. Hume's authoritative account follows the transformation of the Security Council from a stage for acrimonious public diplomacy into a forum where governments collaborate to settle regional disputes. Hume underscores three interconnected themes: changes in Security Council diplomacy during forty-five years of successive conflicts involving Iran and Iraq (including Iraq's 1990 invasion of Kuwait); the Council's progression from involving gentler means within its authority (under the U.N. Charter) to a more muscular assertion of its will; and the growing congruence between diplomacy as practiced in the Security Council and the bilateral policies of the major powers. Based on U.N. documents and the author's firsthand experience, *The United Nations, Iran, and Iraq* is important for students and practitioners in international organizations, multilateral diplomacy, and conflict resolution.

This volume contains the final report of four seasons' excavations, sponsored by the School of Oriental and African Studies and the Iranian Centre for Archaeological Research, at the medium-sized Iranian township of Ghubayra, near Kirman. Ghubayra lies at the crossing of the Caliphal eastern highway from the head of the Persian Gulf to Sistan and Sind, and of the routes from Kirman City to Jiruft and the Gulf seaports around Old Hormuz.

More than two decades after their parents rose up against the Shah's excesses, increasing numbers of young Iranians risk jail at the hands of religious paramilitaries roughly their own age, for things their counterparts in the West take for granted: wearing makeup, slow dancing at parties, holding hands with members of the opposite sex. Every day anxious parents queue at courthouses to bail out sons and daughters who have been detained for 'moral crimes'. Kaveh Basmenji, who spent his own youth amidst the turbulence of the Islamic Revolution, argues that Iran's youth are in near-open revolt for want of greater freedoms, in furious defiance of the mullahs and their brand of sombre religiosity. Through candid interviews with young people, and in a careful assessment of Iran today (including a special chapter on the implications of the recent election to the presidency of hardliner Mahmoud Ahmadinejad), Basmenji gets to the heart of the matter: What do Iran's youth want, and how far are their elders prepared to go to accommodate them?

Iran and the United States are on a collision course. David Barsamian presents the perspectives of four experts on Iran who discuss the 1953 CIA coup and the rise of the Islamic regime, Iran's internal dynamics and competing forces, relations with Iraq and Afghanistan, and the consequences of US policy. Ervand Abrahamian authored *Iran Between Two Revolutions*. Noam Chomsky's most recent book is *Failed States*. Nahid Mozaffari edited the *The PEN Anthology of Contemporary Iranian Literature*. David Barsamian's books include *Imperial Ambitions* with Noam Chomsky and *Original Zinn* with Howard Zinn.

"This is fundamentally a book about change and the politics of managing that change, as successive governments and political elites sought, and continue to seek, to navigate a stable and sustainable route from a perception of tradition to a particular conception of modernity. -- introd.

Writing in a clear and readable style, two leading women of the Jungian school of psychology present this legend as a living myth that is profoundly relevant to modern life. 17 illustrations. Copyright © Libri GmbH. All rights reserved.

Documents Iran's efforts to make itself a major power in the Middle East, supporting terrorist organizations in the region at the same time it is pursuing nuclear, chemical, and biological research at home and building up its military resources.

Mahnaz Kousha interviewed fifteen Iranian women in Tehran who originally came from cities and towns throughout Iran. The youngest was 38, the eldest in her 50s. Extensive excerpts from their dialogues form the heart of this remarkable book. With admirable candor the women explore their relationships with their mothers, fathers, husbands, and children. They reflect upon the institutions of courtship and marriage and address issues of childcare, housework, and women's employment. They talk openly about their concerns, ambitions, and frustrations. Finally, they discuss everyday personal problems and the solutions they devise to cope with such difficulties. Offset by telling commentary, these conversations offer significant firsthand insights into the life experiences of the modern Iranian woman and her brave search for identity. Because it covers previously uncharted ground, this volume fills a sizable gap in the study of gender and family relationships in Iran. Abundant footnotes on similar studies in the United States and other countries not only add sociological richness, but also make the book relevant beyond Iran and the Middle East.

Mark Gasiorowski here examines the cliency relationship that existed between the United States and Iran during the reign of the late shah, Mohammad Reza Pahlavi, and assesses the effects of this relationship on Iran's domestic politics. Gasiorowski argues that by bolstering the shah's repressive regime in the 1950s and early 1960s, the U.S.-Iran cliency relationship indirectly helped bring about the Iranian revolution.
