This volume is the completely reset Second Edition of Jeanne Marie Neumann's A College Companion (Focus, 2008). It offers a running exposition, in English, of the Latin grammar covered in Hans H. Ørberg's Familia Romana, and includes the complete text of the Ørberg ancillaries Grammatica Latina and Latin–English Vocabulary. It also serves as a substitute for Ørberg's Latine Disco, on which it is based. As it includes no exercises, however, it is not a substitute for the Ørberg ancillary Exercitia Latina I. Though designed especially for those approaching Familia Romana at an accelerated pace, this volume will be useful to anyone seeking an explicit layout of Familia Romana's inductively-presented grammar. In addition to many revisions of the text, the Second Edition also includes new units on cultural context, tied to the narrative content of the chapter.

Although Cheryl Lowes Latina Christiana program has been widely hailed for its easy to use format and student friendly layout, some parents asked us for something they could use with their young elementary children. So, we gathered together our years of experience with young Latin scholars and created Prima Latina, an introductory Latin course for students in kindergarten through fourth grades. Prima Latina was developed for young children who are still becoming familiar with English grammar and wish to learn Latin at a slower pace. The program provides 25 lessons, each including a grammar skill, 5 vocabulary words

with corresponding English derivatives, a practical Latin phrase, and one line of a prayer that is learned in totality over five lessons. The exercises that accompany each lesson are thorough and provide constant review of materials learned throughout the course. After each five lessons, a review chapter summarizes the material covered and provides a keyed test to insure mastery. With grammar lessons appropriate for primary grades and an easy to read two color format, Prima Latina is the perfect choice for those who would like to start Latin early and lay the foundation of a rigorous language arts program. Prima Latina was written to transition directly into Latina Christiana allowing students to complete an entire Latin sequence without missing important concepts or vocabulary. Prima Latina is accompanied by an audio CD which includes pronunciation direction for each lesson and four beautiful hymns from Lingua Angelica. Because Latina Christiana I Flash Cards include every word in Prima Latina, they are an ideal study aid and a great investment for students who intend to continue on with Latina Christiana. Prima uses a clear and systematic format to introduce Latin to young students. It teaches important English and Latin grammar concepts as well as vocabulary, sayings, prayers, hymns, and constellation. Some of the material covered in Prima is:

Is your child getting lost in the system, becoming bored, losing his or her natural eagerness to learn? If so, it may be time to take charge of your child's education—by doing it yourself. *The Well-Trained Mind* will instruct you, step by step, on how to give your child an academically rigorous, comprehensive education from preschool through high school—one that will train him or her to read, to think, to understand, to be well-rounded and curious about learning. Veteran home educators Susan Wise Bauer and Jessie Wise outline the classical pattern of education called the trivium, which organizes learning around the maturing capacity of the child's mind and comprises three stages: the elementary school "grammar stage," when the building blocks of information are absorbed through memorization and rules; the middle school "logic stage," in which the student begins to think more analytically; and the high-school "rhetoric stage," where the student learns to write and speak with force and originality. Using this theory as your model, you'll be able to instruct your child—whether full-time or as a supplement to classroom education—in all levels of reading, writing, history, geography, mathematics, science, foreign languages, rhetoric, logic, art, and music, regardless of your own aptitude in those subjects. Thousands of parents and teachers have already used the detailed book lists and methods described in *The Well-Trained Mind* to create a truly superior education for the children in their care. This extensively revised fourth edition contains completely updated curricula and book lists, links to an entirely new set of online resources, new material on teaching children with learning challenges, cutting-edge math and sciences recommendations, answers to common questions about home education, and advice on practical matters such as standardized testing, working with your local school board, designing a high-school program, preparing transcripts, and applying to colleges. You do have control over what and how your child learns. *The Well-Trained Mind* will give you the tools you'll need to teach your child with confidence and success.
