Cost Accounting for CA/IPCC (Group 1) & Quick Revision

Establish the strong foundation in the accounting fundamentals needed to succeed with Warren/Jones/Taylor's *FINANCIAL AND MANAGERIAL ACCOUNTING*, 15E. Memorable business examples throughout this leading book provide a meaningful context as they demonstrate how content from each chapter fits into the big accounting picture. The authors clearly connect fundamental accounting concepts to challenges and triumphs in real businesses today. For instance, each chapter begins with a real-world company opener that is linked to applicable content throughout the chapter. In addition, new Certified Management Accountant (CMA) exam questions prepare readers for professional success, while Pathways Challenges help hone critical-thinking skills. Trust *FINANCIAL AND MANAGERIAL ACCOUNTING* to master the accounting concepts most important in business today. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

The only text to strike a balance between solid financial theory and practical applications, Brigham/Ehrhardt's *FINANCIAL MANAGEMENT: THEORY AND PRACTICE*, 15e gives you a thorough understanding of the essential concepts you need to develop and implement effective financial strategies. The book begins with a presentation of corporate finance fundamentals before progressing to discussions of specific techniques used to maximize the value of a firm. It also explores the recent financial and economic crises and the role of finance in the business world. With its relevant and engaging presentation, numerous examples, and emphasis on Excel usage, this text serves as a complete reference tool for you in your academic or business career. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

As the long-time #1 best-seller, Garrison has helped guide close to 3 million students through managerial accounting since it was first published. It identifies the three functions managers must perform within their organisations - plan operations, control activities, and make decisions - and explains what accounting information is necessary for these functions, how to collect it, and how to interpret it. Garrison's *Managerial Accounting* is known for its relevance, accuracy, and clarity. It is also unique in that the authors write the most important supplements that accompany the book: solutions manual, test bank, instructor's manual, and study guide making them both of high quality and extremely consistent with the textbook.

This book is an essential guide to understanding how managers in China and Southeast Asia make effective economic decisions. In today's competitive global economy, it's vital to grasp how the most dynamic part of Asia is employing accounting tools in actual practice. The carefully crafted empirical studies presented here demonstrate the application of management accounting concepts in a variety of economic scenarios. Overall, these comparative investigations describe theory and common practices in a way that yields insights for both strategic and day-to-day problem solving. Accordingly, *Management Accounting in China and Southeast Asia* will interest graduate students, professional practitioners, and researchers in accounting, management, and finance.

This popular text offers clear and comprehensive coverage of management and cost accounting for students and professionals. *Management and Cost Accounting* is the European adaptation of Horngren, Datar and Rajan's leading US text, *Cost Accounting: A Managerial Emphasis*. The content has been significantly revised to reflect management accounting syllabuses across Europe. Rich in examples and real-life applications, *Management and Cost Accounting* brings technical and theoretical concepts to life. The international focus of the text is supported by a wealth of case studies featuring companies from around the world, and all coverage is fully updated in line with recent research.

"Realizing that most students in an introductory managerial accounting course are not going to major in accounting, this book seeks to position managerial accounting in a broader context of business decision making."--Pref.

News Professor Cheng-Few Lee ranks #1 based on his publications in the 26 core finance journals, and #163 based on publications in the 7 leading finance journals (Source: *Most Prolific Authors in the Finance Literature: 1959–2008* by Jean L Heck and Philip L Cooley (Saint Joseph's University and Trinity University)). This is an extensively revised edition of a popular statistics textbook for business and economics students. The first edition has been adopted by universities and colleges worldwide, including New York University, Carnegie Mellon University and UCLA. Designed for upper-level undergraduates, MBA and other graduate students, this book closely integrates various statistical techniques with concepts from business, economics and finance and clearly demonstrates the power of statistical methods in the real world of business. While maintaining the essence of the first edition, the new edition places more emphasis on finance, economics and accounting concepts with updated sample data. Students will find this book very accessible with its straightforward language, ample cases, examples, illustrations and real-life applications. The book is also useful for financial analysts and portfolio managers.
