Now, with more than 40,000 pre-med students applying for the few available slots each year, scoring well on the Medical College Admission Test (MCAT) is more critical than ever. The MCAT Preparation Guide offers students a systematic, sensible way to improve MCAT test scores. It recognizes their need to understand not only the subject areas covered but also the way the MCAT is structured and what test scorers look for. Extensively field tested at the University of Chicago, Tulane University, Howard University, and the University of Kentucky, this Guide has already helped hundreds of students to boost their MCAT scores significantly. With this edition, the Guide becomes available nationwide for the first time. This book is a student reference guide book for the MD/PhD application process. It begins with an overview of the structure of a typical MD/PhD program as well as student outcomes and career choices of MD/PhD graduates. Next is an outline of the academic and extracurricular prerequisites as well as the basic components of the application itself. The authors then address the factors that MD/PhD students should consider when selecting schools to which to apply. Continuing to the main application, examples are provided of all the different essay types that MD/PhD applicants will encounter along with comments on how to address the deliberately vague and abstract prompts while tailoring the responses to the combined-degree program. Most uniquely, included is a very detailed explanation of the many types of interviews that applicants will encounter and how to prepare for them by integrating extensive personal experience and first-hand discussions with MD/PhD program leaders. Lastly, there will be a discussion on how to cope with the year-long timeline that constitutes this application process and provide guidance regarding properly responding to acceptances and waitlist offers. Written by a team of authors each experienced with the MD/PhD application, this book aids the prospective applicant with navigating this challenging process.
