This manual is based on current neuroscience and treatment outcome studies that demonstrate the importance of focusing on the full range and depth of emotional and social functioning. Beginning with a classification of the spectrum of personality patterns and disorders found in individuals and then describing a profile of mental functioning that permits a clinician to look in detail at each of the patient's capacities, the entries include a description of the patient's symptoms with a focus on the patient's internal experiences as well as surface behaviors. Intended to expand on the DSM (Diagnostic and Statistical Manual of Mental Disorders) and ICD (International Statistical Classification of Diseases and Related Health Problems) efforts in cataloging the symptoms and behaviors of mental health patients, this manual opens the door to a fuller understanding of the functioning of the mind, brain, and their development.

This is the story of Ed and Ramona, high school lovers who married young. And when Ramona, seeing the ever-clearer reality of life with Ed, turns and walks away from her house, from her life, and from her small baby boy, Ed is stunned into a depth of uncomprehending rage. With a deer hunter's patience and a maniacal precision, Ed gathers what he needs and, in the dark of early winter, leaves to find his wife. "
