The answer to each question is accompanied by an explanation. Each category has an introduction to set the scene for the questions to come. However, not all possible information is provided within these Introductions, so an Anatomy and Physiology textbook is an indispensable aid to understanding the answers. The questions have been used in end-of-semester examinations for undergraduate anatomy and physiology courses and as such reflect the focus of these particular courses and are pitched at this level to challenge students that are beginning their training in anatomy and physiology. The question and answer combinations are intended for use by teachers, to select questions for their next examinations, and by students, when studying for an upcoming test. Students enrolled in the courses for which these questions were written include nursing, midwifery, paramedic, physiotherapy, occupational therapy, nutrition and dietetics, health sciences, exercise science, and students taking an anatomy and physiology course as an elective.

Aan de westkust van Turkije ligt het eiland Lesbos, dat door een lagune vrijwel in tweeën is verdeeld. Dit is de plek waar, 2400 jaar geleden, Aristoteles besloot zich te gaan verdiepen in de natuurlijke wereld. Iedereen kent Aristoteles als filosoof – maar dat hij ook voor de biologie van enorm belang is geweest, is een beetje vergeten. Hij schreef alles op wat hij over de dierenwereld kon zeggen, teksten die bekendstaan onder de naam *Historia Animalium*. Eeuwenlang trokken wetenschappers er niet meer op uit om te kijken hoe de natuur erbij lag: ze sloegen simpelweg Aristoteles erop na. Vanaf de zeventiende eeuw kwam het tegengeluid: 'Bestudeer de natuur! Niet de boeken!' Zo verdween Aristoteles langzaam uit de wetenschappelijke canon. Nu is het tijd voor een herwaardering: Armand Leroi herstelt in dit boek de reputatie van Aristoteles de wetenschapper. Niet alleen was hij de eerste bioloog, hij is nog steeds een van de grootste. Met *De lagune* geeft Leroi werkelijk een nieuwe visie op leven en werk van de filosoof.
