historian and spiritual ecologist Thomas Berry, described by Newsweek magazine as “the most provocative figure among the new breed of eco-theologians,” passed away in 2009 at age 94, he left behind a dream of healing the “Earth community.” In his numerous lectures, books, and essays, Berry proclaimed himself a scholar of the earth, a “geologist,” and diligently advocated for a return to Earth-based spirituality. This anthology presents 10 essays from leading philosophers, scientists, and spiritual visionaries--including Matthew Fox, Joanna Macy, Duane Elgin, Sean Esbjörn-Hargens, Ervin Laszlo, and Allan Combs--on the genius of Berry’s work and his quest to resolve our global ecological and spiritual challenges, as well as a little-known but essential essay by Berry himself. Revealing Berry’s insights as far ahead of their time, these essays reiterate the radical nature of his ideas and the urgency of his most important conclusion: that money and technology cannot solve our problems, rather, we must reestablish the indigenous connection with universal consciousness and return to our fundamental spontaneous nature--still evident in our dreams--in order to navigate our ecological challenges successfully.

Though he was a prolific writer and an original thinker of vast erudition, Jung lacked a gift for clear exposition and his ideas are less widely appreciated than they deserve. In this concise introduction, Anthony Stevens explains clearly the basic concepts of Jungian psychology: the collective unconscious, complex, archetype, shadow, persona, anima, animus, and the individuation of the Self. He examines Jung's views on such disparate subjects as myth, religion, alchemy, 'synchronicity', and the psychology of gender differences, and he devotes separate chapters to the stages of life, Jung's

theory of psychological types, the interpretation of dreams, the practice of Jungian analysis, and to the unjust allegation that Jung was a Nazi sympathizer. Finally, he argues that Jung's visionary powers and profound spirituality have helped many to find an alternative set of values to the arid materialism prevailing in Western society.

In the cycles of the great season of creativity, we are sometimes given a rare and

precious gift. This season, that gift is *You Can't Trust Your Own Mind*, by David French PhD., a book about how to excavate your deep, true identity and stop the fear and alienation automatically and reactively imposed by the mind. Inspired by discipline, experience, understanding, and compassion, his words embrace a deeper truth with the reader and lead to common ground where we can all see what is real and what is not: “myself and the machine”, “your self and the machine”. With his self-disclosing style, he shows us how to find emotional shelter when we are injured: how to be truthful when we want to lie; how to build trust when we feel alone, and misunderstood. He helps us discover triggers that alarm the machine and cause swift destructive actions. He finds the power concealed within our own vulnerability, and gives us the courage to own our own pain. He gives us tools for more satisfying relationships, hope for self fulfillment, and permission to be who we are without games, fears, and self-sabotaging rituals of the ancient reactive “machine”. He shows each of us how to accept the “machine” that vigilantly and perpetually serves us with a singular directive: to monitor, protect, and destroy all perceived threats, before the deep sacred self is even aware of them. What others are saying about this book: Through Dr. French's Personal balance Therapy, he brings together all the parts of what makes each one of us unique, and sets the reader on the path of wholeness. -

D.C. Hadden, Psy.D., Licensed Clinical Psychologist This book can save ones sanity, relationships, maybe even one's life. Patients of mine commonly arrive in a state of despair and depression, losing all hope, faith, trust and love. Readers may be skeptical to try yet another book top better understand the hurt within, but believe this book will open one's eyes and direct one to experiencing inner piece. To be able to see the pasterns of our actions that lead us to heartache and frustration is eye opening and allows the reader to understand the “automatic self”. Dr. French teaches that by modifying and reeducating the “Machine” that allows us to achieve a balance with our “real self.”The descriptions were right on target. The reader will find this book encouraging, even those that may feel that they are too far gone to be helped .many readers will find themselves, turning back to this book again and again when they are in need of a “reality check.”They will find healing in the pages within. - James S. eigen problemen die we het hoofd moeten bieden, evenals de moeilijkheden van anderen, kunnen doorgronden en oplossen. Het resultaat is een wijze benadering van menselijke problemen die zowel optimistisch als realistisch is, zelfs in tijden van grote uitdagingen.

Ranger Lieutenant Kelib Statton is a Spirit Shifter. By channeling the essence of his guardian spirit, the Shadow Dragon, he can alter his physiology granting him enhanced senses, increased strength and stamina, more highly developed reflexes, and the instincts of an alpha predator. However, such power comes at a price. To use his skills, Statton must allow the dragon access to both his mind and body. The more he uses his abilities, the stronger the dragon's influence becomes. If his concentration wavers the sheer power and predatory nature of the dragon can easily overwhelm him, stripping away his control and unleashing a creature ruled by the instincts of a predator, fueled by the power of an ancient spirit and guided by the reasoning ability of its human host. To use his skills to the fullest Kelib needs a companion, a sensi, to help him control the spirit's wild nature, someone to help keep his human side in control. Fortunately, nature has provided such a helper. Sensi, like Spirit Shifters, bond with a spirit guide. Instead of receiving physical augmentations from the joining, sensi are gifted with enhancements of the mind and soul. All sensi have at least one psychic talent. Most have more than one, ranging the gambit from telepathy and telekinesis to the rare empathic healer but the one ability all sensi share is empathy. Their empathic gift

allows a sensi to forge an unbreakable emotional link with their chosen shifter. Through the bond they can monitor their shifter's well-being and emotional state and, when needed, curb the more violent of the shifter's instincts, bringing the man back into control. Anchored by a sensi, a shifter can push his body and senses to the fullest without losing himself to the animal within. And the sensi gains a defender to protect him from those who would seek to control him for his power. Strength calls to strength, and there is only one match between sensi and shifter. Statton is the first Shadow Dragon shifter to be born in over a century, and there is only one sensi able to match him in power, the Phoenix. Kelib has spent his entire adult life looking for the only Phoenix sensi in existence, with no success. When his ranger unit is dispatched to retrieve a downed medi-probe from a dangerous jungle planet, he feels the power binding the dragon fraying. Either the magick used to restrict his powers when he was a child is fading, or his sensi is near. Now if only he can stay alive long enough to find him. For Jangal is a world of deadly predators and it will take all of his skills as a warrior and shifter to keep his team alive long enough to complete their mission and track down his elusive bondmate.

his SEAL team was sent to recover Bowe Bergdahl—the soldier who deserted his post and fell into the hands of Al-Qaida and the Taliban. The mission went south, and Hatch was left with a shattered femur from an AK-47 round and the SEAL dog who fought alongside him was dead. As a result of his horrific leg wound, his twenty-four-year military career came to an end—and with it the only life he'd ever known. In *Touching the Dragon*, we witness his long road to recovery. Getting well physically required eighteen surgeries, twelve months of recovery, and learning to walk again. But getting well mentally would prove to be much tougher, as he fought through the depths of despair, alcoholism, and the pull to end his own life. What emerges is a different kind of hero's journey, one in which Hatch shows the courage it takes to confess, confront, and overcome his own brokenness. Through the love of family, friends, and his military dogs, Hatch learned remarkable tools and found his purpose, and now he wants to share this wisdom with the rest of us because we all have wounds.

Anthony Stevens has devoted a lifetime to modernizing our understanding of the archetypes within us, relating them to conceptual developments in a variety of scientific disciplines, such as the patterns of behaviour of behavioural ecology, the species-specific behavioural systems of Bowlby's attachment theory, the deep structures of Chomskian linguistics, and the modules of evolutionary psychology, to name but a few. This selection of papers and chapters from the course of Stevens' career, all lucidly written and argued, highlight episodes in the progress of his quest to place archetypal

theory on a sound scientific foundation. As a whole, *Living Archetypes* examines how archetypes are activated in the life history of all of us, how archetypal imperatives may be fulfilled or thwarted by our living circumstances, how they manifest in our dreams, symbols, fantasies and symptoms, and how appreciating their dynamics can generate insights of enormous therapeutic power. *Living Archetypes: The Selected Works of Anthony Stevens* provides an invaluable resource for Jungian psychotherapists, psychologists, academics and students committed to extending the evolutionary approach to psychology and psychiatry and understanding the dynamic significance of archetypes.

*Dragonfire Quest* is the first digital bundle in *The Dragonfire Novels: The Complete Series* and includes the three books that launch the Dragon's Tail Wars between the Pyr, dragon shifters pledged to defend the treasures of the earth, and the evil Slayers, dragon shifters bent on destroying both the Pyr and the humans they protect. In *Kiss of Fire*, dragon shifter Quinn Tyrrell is caught between the firestorm with his destined mate, Sara Keenan, and his hereditary responsibilities as the Smith of the Pyr. But Quinn has learned to be skeptical of his fellow dragon shifters and it's only when the evil Slayers target Sara that he realizes he needs the help of his own kind. Can pragmatic Sara be persuaded to believe that she's his destined mate and the foretold Seer of the Pyr? Can Quinn win Sara's heart before it's too late for them, their firestorm, and the Pyr? In *Kiss of Fury*, Donovan Shea, the dragon shifter assigned to defend

scientist Alex Madison from the Slayers who have killed her partner, is surprised by the spark of his own firestorm. Donovan has no interest in commitment, especially one who has nightmares about dragons. All the same, there's something special about Alex, something that feeds a heat in Donovan beyond that of the firestorm. Can they work together to save her invention, the Green Machine, without surrendering to the firestorm's demand? If they embrace the promise of a future together, will the Slayers attack Alex again? In Kiss of Fate, Erik Sorensson, leader of the Pyr, has to confront past failures when he has a second chance at true love. Outspoken and independent Eileen Grosvenor isn't what Erik expects in a mate, but he admires her creativity and her resilience. Eileen has her doubts about trusting a dragon shifter, but when she's targeted by Slayers for the treasure she's claimed, having a good dragon on her side sounds like a plan. Can Erik and Eileen learn to work together to triumph in time—over Slayers, the wounds of the past, and even their own assumptions? \*\*\* The Dragonfire Series of Paranormal Romances Each Dragonfire Novel is a complete romance, but you would probably prefer to read them in order to follow the story of the Dragon's Tail Wars, the final battle for supremacy between the Pyr and the evil Slayers. Can Darwinian evolution actually prove that we are alone in the Universe? This book illustrates that Darwinian evolution is not an empirically predictable or testable scientific paradigm. Also shows that ancient artifacts on Mars and the Moon are evidence of Game Wardens in our own solar system. Could the Earth be a controlled DNA repository for the ongoing creation and dissemination of life forms, including humans? The author puts forth compelling evidence in this well researched work.

Zijn buitenaardse beschavingen iets van de toekomst of van het verleden? Van de bestsellerauteur van Waren de goden kosmonauten In dit boek wordt de oude Griekse geschiedenis in een volkomen nieuw perspectief gesteld: de oude mythen zijn in feite een weergave van echte gebeurtenissen. De hoofdrolspelers (goden) buitenaardse wezens die duizenden jaren geleden de aarde bezochten. Archeologische vondsten en de geschriften van Plato en Aristoteles ondersteunen zijn theorie. Fear and Primordial Trust explores fear as an existential phenomenon and how it can be overcome. Illustrated by clinical examples from the author's practice as a psychotherapist and spiritual caregiver working with the severely ill and dying, the book outlines theoretical insights into how primordial trust and archaic fear unconsciously shape our personality and behaviour. This book discusses in detail how in our everyday world, we lack primordial trust. Nevertheless, all of us have internalized it: as experiences of another non-dual world, of being unconditionally accepted, then sheltered and nurtured. The book outlines how from a spiritual viewpoint, we come from the non-dual world and experience a transition by becoming an ego, thereby experiencing archaic fear. This book explains fear in terms of two challenges

encountered in this transition: firstly, leaving the non-world world when everything changes and we feel forlorn. Secondly, on awakening in the ego when we feel dependent and overwhelmed by otherness. The book also helps readers to understand trust as the emotional and spiritual foundation of the human soul, as well as how fear shapes us and how it can be outgrown. The book makes the case that understanding fear and primordial trust improves care and helps us to better understand dying. It will be of interest to academics, scholars and students in the fields of psychiatry, counselling, psychotherapy and palliative care and to all those interested in understanding fear, trust and the healing potential of spiritual experiences. Offering a new template for future exploration, Susan Greenwood examines and develops the notion that the experience of magic is a panhuman orientation of consciousness, a form of knowledge largely marginalized in Western societies. In this volume she aims to form a "bridge of communication" between indigenous magical or shamanic worldviews and rationalized Western cultures. She outlines an alternative mythological framework for the latter to help develop a magical perception, as well as giving practical case studies derived from her own research. The form of magic discussed here is not fantastic or virtual, but ecological and sensory. Magical knowledge infiltrates the body in its deepest levels of the subconscious, and unconscious, as well as conscious awareness; it is felt and understood through the connection with an inspired world that includes the consciousness of other beings,

including those of plant, animal and the physical environment. This is anthropology from the heart rather than the head, and it engages with the messy area of emotions, an embodiment of the senses, and struggles to find a common language of listening to one another across a void of differences. The aim is to provide a non-reductive structure for the creative interplay of both magical and analytical modes of thought. Passion is a motivator for change, and a change in attitude to magic as an integrative force of human understanding is the main thread of this work.
