

Ross Westerfield Jaffe Corporate Finance 10th Edition

Corporate Finance: Core was developed for the graduate (MBA) level as a concise, up-to-date, and to-the-point product, the majority of which can be realistically covered in a single term or course. To achieve the objective of reaching out to the many different types of students and the varying course settings, corporate finance is distilled down to its core, while maintaining a decidedly modern approach. Purely theoretical issues are downplayed, and the use of extensive and elaborate calculations is minimized to illustrate points that are either intuitively obvious or of limited practical use. The goal was to focus on what students really need to carry away from a principles course. A balance is struck by introducing and covering the essentials, while leaving more specialized topics to follow-up courses. Net present value is treated as the underlying and unifying concept in corporate finance. Every subject covered is firmly rooted in valuation, and care is taken throughout to explain how particular decisions have valuation effects. Also, the role of the financial manager as decision maker is emphasized, and the need for managerial input and judgment is stressed.

major fields of corporate finance (capital structure, corporate governance and valuation). This assessment is done for the traditional asset-intensive industrial firm, one of two basic types of firms in today's economy. For giving an additional insight into current research, the recently emerged human-capital intensive firm is shortly described in comparison to the traditional asset-intensive firm, and implications for corporate finance for this new type of firm are explained. As a conclusion, three major results can be stated: firstly, the theory of the firm definitely in

Moet er strenger gestraft worden of juist niet? Mag de rechter door de wetgever aan banden worden gelegd? In hoeverre mag de overheid ingrijpen in het privéleven van haar burgers? Deze vragen zijn inzet van menig opiniërend krantenartikel of discussieprogramma. Ook degenen die zich beroepshalve met het recht bezighouden zullen zich van tijd tot tijd moeten bezinnen op taak en functie van het recht. Moeten we regels toepassen als ze tot onrechtvaardige uitkomsten leiden? Leiden regels wel tot het doel waarvoor ze zijn opgesteld? Dit zijn allemaal vragen over het recht waarop door het recht zelf geen antwoorden kunnen worden gegeven. Betekent dit dat discussies over deze kwesties zinloos zijn omdat zij ontaarden in politieke welles-nietes spelletjes? Deze inleiding in de rechtsfilosofie beoogt te laten zien dat dit niet hoeft.

Vergeet alles wat je weet over hoe je mensen moet motiveren, het zit anders in elkaar dan je dacht. Het geheim van goed presteren, plezier en zin in je leven en werk is de intrinsieke motivatie. Dat is je diepe wens om je eigen leven te bepalen, nieuwe dingen te leren en te creëren en bij te dragen aan zinvolle zaken. Daniel Pink toont aan dat de geaccepteerde wijsheid over mensen motiveren niet strookt met hoe wij thuis en op het werk elke dag te werk gaan. De oude manier van belonen en straffen werkt voor de meeste taken niet meer. Kijk maar naar de bonuscultuur bij bedrijven: een slecht middel voor een goed doel. Het gevolg van verkeerde beloning is dat we slechte kwaliteit leveren en uiteindelijk minder betrokken raken bij wat we doen. 'Een van de
