Bringing together sources from many countries and many centuries, this study critically analyses the growth of nationalism - from medieval ethnic prejudice to the Romantic belief in a nation's "soul". The belief and ideology of the nation's cultural individuality emerged from a Europe-wide exchange of ideas, often articulated in literature and belles lettres. In the last two centuries, these ideas have transformed the map of Europe and the relations between people and government. Tracing the modern European nation-state as the outcome of a cultural self-invention, cross-nationally and historically, Leerssen also provides a new approach to Europe's contemporary identity politics. This study of nationalism offers a startling new perspective on cultural and national identity. National Thought in Europe is the revised English-language edition of Nationaal denken in Europa. Een cultuurhistorische schets (AUP, 1999). For more information on the English and edited edition, see National thought in Europe

This book constitutes the thoroughly refereed post-proceedings of the 6th International Workshop on Privacy Enhancing Technologies, PET 2006, held in Cambridge, UK, in June 2006 co-located with WEIS 2006, the Workshop on the Economics of Information Security, and WOTE 2006, the IAVoSS Workshop On Trustworthy Elections. The 24 revised full papers present novel research on all theoretical and practical aspects of privacy technologies.
