Als dokter Dolittle van een zwaluw het bericht ontvangt van een vreselijke ziekte onder de apen in Afrika, gaat hij met zijn dieren onmiddellijk op weg om hen te helpen.

For four decades, this extraordinary textbook played a pivotal role in the way biochemistry is taught, offering exceptionally clear writing, innovative graphics, coverage of the latest research techniques and advances, and a signature emphasis on physiological and medical relevance. Those defining features are at the heart of this new edition. The ninth edition of Stryer/Berg Biochemistry focuses on the themes of visualization and assessment and is now paired for the first time with SaplingPlus, the most innovative digital solution for biochemistry students. SaplingPlus offers the best combination of media-rich resources to help students visualize material and develop successful problem-solving skills to master complex concepts in isolation, and draw on that mastery to make connections across concepts. Built-in assessments help students keep on track with reading and become proficient problem solvers with guidance from hints and targeted feedback, ensuring every problem counts as a true learning experience.

Lehninger Principles of Biochemistry is the #1

bestseller for the introductory biochemistry course because it brings clarity and coherence to an often unwieldy discipline, offering a thoroughly updated survey of biochemistry's enduring principles, definitive discoveries, and groundbreaking new advances with each edition. This new Seventh Edition maintains the qualities that have distinguished the text since Albert Lehninger's original edition—clear writing, careful explanations of difficult concepts, helpful problem-solving support, and insightful communication of contemporary biochemistry's core ideas, new techniques, and pivotal discoveries. Again, David Nelson and Michael Cox introduce students to an extraordinary amount of exciting new findings without an overwhelming amount of extra discussion or detail. And with this edition, W.H. Freeman and Sapling Learning have teamed up to provide the book's richest, most completely integrated text/media learning experience yet, through an extraordinary new online resource: SaplingPlus.

Dit boek behandelt de theorie en pikt en passant ook nog kernenergie mee en een hoop natuurkunde. Vertaling in proza van de door de 12e-eeuwse Bretonse dichteres uit de mond van troubadours opgetekende, berijmde verhalen over ridderliefde en weerwolven.

Key features

- A review of basic principles
- Chemical and biological principles in *lanace*
- Real-world relevance
- The most robust problem-solving program available
- Simple, clear illustrations
- Currency
- New to this edition
- 258 additional end-of-chapter revision questions
- New chemistry primer
- New chapter-opening vignettes
- New 'Biochemistry in Perspective' boxes
- Expanded coverage throughout
- In-chapter 'key concept' lists

Derived from the classic text originated by Lubert Stryer and continued by John Tymoczko and Jeremy Berg, *Biochemistry: A Short Course* focuses on the major topics taught in a one-semester biochemistry course. With its brief chapters and relevant examples, this thoroughly updated new edition helps students see the connections between the biochemistry they are studying and their own lives. The focus of the 4th edition has been around: **Integrated Text and Media with the NEW SaplingPlus Paired** for the first time with SaplingPlus, the most innovative digital solution for biochemistry students. Media-rich resources have been developed to support

students' ability to visualize and understand individual and complex biochemistry concepts. Built-in assessments and interactive tools help students keep on track with reading and become proficient problem solvers with the help and guidance of hints and targeted feedback--ensuring every problem counts as a true learning experience. Tools and Resources for Active Learning A number of new features are designed to help instructors create a more active environment in the classroom. Tools and resources are provided within the text, SaplingPlus and instructor resources. Extensive Problem-Solving Tools A variety of end of chapter problems promote understanding of single concept and multi-concept problems. Built-in assessments help students keep on track with reading and become proficient problem solvers with the help and guidance of hints and targeted feedback--ensuring every problem counts as a true learning experience. Unique case studies and new Think/Pair/Share Problems help provide application and relevance, as well as a vehicle for active learning.

Chemistry: The Molecular Nature of Matter and Change by Martin Silberberg and Patricia Amateis has been recognized in the general chemistry market as an unparalleled classic. The revision for the eighth edition focused on continued optimization of the text. To aid in this process, we were able to use data from literally thousands of student responses to questions in LearnSmart, the adaptive learning system that assesses student knowledge of course content. The data, such as average time spent answering each question and the

percentage of students who correctly answered the question on the first attempt, revealed the learning objectives that students found particularly difficult, which we addressed by revising surrounding text or adding additional learning resources such as videos and slideshows. The text still contains unprecedented macroscopic-to-microscopic molecular illustrations, consistent step-by-step worked exercises in every chapter, and an extensive range of end-of-chapter problems, which provide engaging applications covering a wide variety of interests, including engineering, medicine, materials, and environmental studies. Changes have been made to the text and applications throughout to make them more succinct, to the artwork to make it more teachable and modern, and to the design to make it more simplistic and open.

Guinn's Essentials of General, Organic and Biochemistry uses health and medicine as the framework for learning the fundamentals of chemistry in this student-centered one-semester text. The newly revised 3rd edition focuses on core concepts and necessary math skills, and features a revamped organization to align with traditional course organization and shorter, more condensed chapters. Easily digestible content and medical applications help reduce student anxiety and make chemistry meaningful for students preparing for future careers in nursing and other allied health professions. Paired with SaplingPlus and an embedded eBook,

Zelf koken plaatst de mens tussen natuur en cultuur dat is de plek waar we mens het gelukkigst zijn. Pollan laat ons zien hoe de mens tot de meest vernuftige methoden kwam om rauw voedsel om te zetten in verrukkelijke spijzen en dat zelf koken dé manier is om gezonder en gelukkiger te worden. Met verhalen over zijn zoektocht aan de hand van vuur, water, lucht en aarde laat hij ons thuiskomen in de keuken. Met zijn krachtige proza en sterk betoog zou Pleidooi voor zelf koken wel eens net zo invloedrijk kunnen worden als Pollans eerste boek The Omnivore's Dilemma. emThe Washington Post `Een mooie passage over de relatie tussen barbecue en offeren aan de goden wisselt hij af met het verhaal van ontploffend zelfbrouwbier in de kelder van huize Pollan, een levendig portret van de zuurkoolbacterie of een meditatie over de relatie tussen kaas, seks en dood.

Give allied health students the chemistry they need...how and when they need it! Designed to prepare students for health-related careers, General, Organic, and Biological Chemistry: Structures of Life breaks chemical concepts and problem solving into clear, manageable pieces, ensuring students follow along and stay motivated throughout their first, and often only, chemistry course. Karen Timberlake's friendly writing style, student focus, vetted and refined clinical chemistry problems, and engaging health-related applications help today's students make connections between chemistry and their intended careers as they develop the problem-solving skills they'll need beyond the classroom. The Fifth Edition fully integrates the text with MasteringChemistry to provide an interactive and engaging experience. New Construct a Concept Map activities help students connect ideas through video solutions and live demonstrations, while the text and media establish a clinical focus that ties chemistry directly to allied health. Instructors can also assign MasteringChemistry's new Dynamic Study Modules, which enable students to remediate core math and chemistry skills outside of class, freeing professors to focus on GOB Chemistry concepts and problem solving during class. Also available with MasteringChemistry MasteringChemistry from Pearson is the leading online homework, tutorial, and assessment system, designed to

improve results by engaging students before, during, and after class with powerful content. Instructors ensure students arrive ready to learn by assigning educationally effective content before class, and encourage critical thinking and retention with in-class resources such as Learning Catalytics. Students can further master concepts after class through traditional and adaptive homework assignments that provide hints and answer-specific feedback. The Mastering gradebook records scores for all automatically graded assignments in one place, while diagnostic tools give instructors access to rich data to assess student understanding and misconceptions. Mastering brings learning full circle by continuously adapting to each student and making learning more personal than ever-before, during, and after class.

Visit http://www.saplinglearning.com/partners/partner_page_oxford.php to learn more about Sapling Learning and how pairing this incredible system with McKee & McKee's Biochemistry: The Molecular Basis of Life will help improve your instruction and your students' learning. Distinctive Features *A Review of Basic Principles. To ensure that all students are sufficiently prepared for acquiring a meaningful understanding of biochemistry, the first four chapters - now streamlined for easier coverage and self-study assignment - review the principles of relevant topics such as organic functional groups, noncovalent bonding, thermodynamics, and cell structure. *Chemical and Biological Principles in Balance. Comprehensive coverage offers the flexibility for each instructor to decide how much chemistry or biology to present. Chemical mechanisms are always presented within the physiological context of the organism. *Real-World Relevance. Because students who take the survey of biochemistry course come from a range of backgrounds and have diverse career goals, the fifth edition consistently demonstrates the fascinating connections between biochemical principles and the fields of medicine, nutrition, agriculture, bioengineering, and forensics. *The most robust Problem-Solving Program available. In-chapter "Worked Problems" illustrate how quantitative problems are solved, and dozens of "Questions" interspersed throughout the chapters provide students with opportunities to put their knowledge into action right when new concepts and high-interest topics are introduced. Chapter overviews, end-of-chapter "Review Questions" and "Thought Questions," and key-word lists help students grasp the big picture in each chapter. *Simple, Clear Illustrations. Biochemical concepts often require a high degree of visualization, and the McKee & McKee art program brings complex processes to life. Over 700 full-color figures, many newly enhanced for a more vivid

presentation in three dimensions and consistent scale and color for chemical structures. *Currency. The fifth edition has been extensively updated with recent developments in the field, while remaining focused on the "big-picture" principles that are the focus of the one-term biochemistry course. New to this Edition *Chapter-opening Vignettes, an all-new feature of the fifth edition, give biological motivation. These 19 essays include the nature and diversity of life, the ocean's dark secret life, spider silk, humans and enzymes, sweet and bitter taste in diet, metabolism and jet engines, evolution as chance and necessity, oxygen's molecular paradox, global warming and renewable energy, the Gulf dead zone, Parkinson's disease and Alzheimer's, hypertension and uric acid, what makes us human, the medical mystery of DNA and chimeras, and the superbug MRSA *New "Biochemistry in Perspective" boxes (9 new in all) on cell regulation and metabolism, protein folding and human disease, quantum tunneling and catalysis, wine production, turbo design dangers, myocardial infarct, the hormone cascade system, and trapped ribosomes *New "Biochemistry in the Lab" boxes on protein sequence analysis and glycomics *Beefed-up chemical coverage with increased emphasis on mechanisms *Enhanced coverage of cutting-edge topics including RNAi, epigenetics and the epigenome, macromolecular crowding, GLUT transporters, systems biology, and the contribution of dietary fructose to the current epidemics of obesity and type II diabetes *"Key Concept" icons, plus additional icons for biomedical applications with new labels identifying the application. Other icons point to JMOL visualization software. *20% more end-of-chapter review and thought questions that were already doubled in number and expanded in range of difficulty in the fourth edition *Updated coverage of coenzymes, viruses, and biotechnology *Extended coverage of amino acids, proteins, enzymes, carbohydrates, nucleic
