

## Satriani

It has been reviled, dismissed, attacked, and occasionally been the subject of Congressional hearings, but still, the genre of music known as heavy metal maintains not only its market share in the recording and downloading industry, but also as a cultural force that has united millions of young and old fans across the globe. Characterized by blaring distorted guitars, drum solos, and dramatic vibrato, the heavy metal movement headbanged its way to the popular culture landscape with bands like Led Zeppelin and Black Sabbath the 1970s. Motley Crue and Metallica made metal a music phenomenon in the 1980s. Heavy metal continues to evolve today with bands like Mastodon and Lamb of God. Providing an extensive overview of the music, fashion, films, and philosophies behind the movement, this inclusive encyclopedia chronicles the history and development of heavy metal, including sub-movements such as death metal, speed metal, grindcore, and hair metal. Essential and highly entertaining reading for high school and undergraduate courses in popular music studies, communications, media studies, and cultural studies, the Encyclopedia of Heavy Metal Music and Culture offers a guide to the ultimate underground music, exploring its rich cultural diversity, resilience, and adaptability. Entries for musicians include a discography for those wanting to start or develop their music collections.

A rich collection of interdisciplinary essays, this book explores the question: what is to be found at the intersection of the sensorium and law's empire? Examining the problem of how legal rationalities try to grasp what can only be sensed through the body, these essays problematize the Cartesian framework that has long separated the mind from the body, reason from feeling and the human from the animal. In doing so, they consider how the sensorium can operate, variously, as a tool of power or as a means of countering the exercise of regulatory force. The senses, it is argued, operate as a vector for the implication of subjects in legal webs, but also as a powerful site of resistance to legal definition and determination. From the sensorium of animals to technologically mediated perception, the ways in which the law senses and the ways in which senses are brought before the law invite a questioning of the categories of liberal humanism. And, as this volume demonstrates, this questioning opens up the both interesting and important possibility of imagining other sensual subjectivities.
