This book discusses the adoption of learning management systems (LMS) in
higher education institutions. It presents influential predictors that may impact
instructors' behavioral intention to adopt learning management systems in the
context of Arab culture, as well as a unique model of technology acceptance that
draws on and combines previous technology adoption models (i.e., a modified
unified theory of acceptance and use of technology model – UTAUT2). Moreover,

this study extends the UTAUT2 model by including Hofstede's (1980) cultural dimensions, and technology awareness as the moderators of the model. It also describes the explanatory technique approach used to collect quantitative data from the instructors at higher education institutions in Saudi Arabia and were analyzed with structural equation modeling using SPSS/Amos software. The findings revealed that facilitating conditions were the strongest predictor of behavioral intention to adopt an LMS, followed by performance expectancy and hedonic motivation, technology awareness, and cultural dimensions exerted a moderating influence on instructors' behavioral intention to use LMS in their teaching. By including new constructs, this becomes the first study of its kind exploring instructors' use of LMS in Higher Educational Institutions of Saudi Arabia and other countries of the Middle East. It offers practical insights for a broad range of researchers and professionals at higher education institutions and serves as a reference guide for designers of learning management systems (e.g., blackboard systems), policymakers, and the Ministry of Education staff. Establish the strong foundation in the accounting fundamentals needed to succeed with Warren/Jones/Taylor's FINANCIAL AND MANAGERIAL ACCOUNTING, 15E. Memorable business examples throughout this leading book provide a meaningful context as they demonstrate how content from each

chapter fits into the big accounting picture. The authors clearly connect fundamental accounting concepts to challenges and triumphs in real businesses today. For instance, each chapter begins with a real-world company opener that is linked to applicable content throughout the chapter. In addition, new Certified Management Accountant (CMA) exam questions prepare readers for professional success, while Pathways Challenges help hone critical-thinking skills. Trust FINANCIAL AND MANAGERIAL ACCOUNTING to master the accounting concepts most important in business today. International accounting standards tend to converge, as do auditing, enforcement and corporate governance, whereas trading of equity shares remains essentially national. The book provides a thorough analysis of what information investors really need, how financial accounting systems developed and their current requirements in major commercial countries, and examines current issues, particularly the benefits and costs a single or multiple accounting standards, the bases for accounting standards, and limitations to accounting disclosure in financial statements.
