Middle school is a time of change, when things begin to look different and assumptions start to be questioned, and today more than ever it's tough to know what to believe. This unique and timely book won't tell you what to think—that's up to you!—but it will show you how to think more deeply about your own life and current events. Covering a wide range of subjects affecting the world today, including human and animal rights, social media, cyber bullying, the refugee crisis, and more, THINK FOR YOURSELF will help you to learn how to ask questions, analyze evidence, and use logic to draw conclusions, so you can solve problems and make smart decisions. Each chapter of the book covers one key step in the critical thinking process, and includes a real-world example to help convey the importance and relevance of every step: Ask Questions: If you want to be a critical thinker, it helps to be curious. It's normal to wonder about the world around us. Some questions are big, and some are small. Sometimes questions can spark debate and argument. All critical thinking starts with at least one question. Gather Evidence: First, find information—from making observations to interviewing experts to researching a topic online or in books. Then make connections and draw conclusions. Evaluating Evidence: Smart thinkers evaluate the importance, accuracy and relevancy of the information they gather. Getting Curious: Consider other points of view, examine your own point of view, understand the power of emotion, and practice empathy. Draw Conclusions: The final step in the critical thinking process, this is based on reason and evidence. Revisit your original question, review the evidence and what you've learned, and consider your values. And remember: critical thinking doesn't stop when you've reached a decision. Learn how to discuss and debate other points of view. Then keep growing. Sometimes you might change your mind—that's OK, too! Featuring profiles of real-life inspiring young critical thinkers from around the world, checklists, quizzes, and activities, THINK FOR YOURSELF is a clever and fun illustrated guide that teaches middle schoolers that even young people can make a difference in the world just by thinking smart and understanding. INCLUDES: Your Turn: activities to help connect ideas to readers' lives Quizzes Profiles of inspiring young critical thinkers A Reading List for Young Thinkers Teacher's guides Plus a table of contents, index, and glossary for easy searching

Het idee van de homo ludens (Latijn voor 'spelende mens') veronderstelt een mensbeeld waarin de mens in de eerste plaats een spelend wezen is. Zoals de titel doet vermoeden gaat Homo ludens (1938) over het belang van het spelelement in de cultuur. Huizinga stelt dat het spel een noodzakelijke bestaansvoorwaarde voor cultuur is. Tegen de 'puerilistische' betekenis van het woord spel, een term die Huizinga gebruikt om de kinderachtigheid van de politiek aan te duiden, heeft Huizinga het over de ernst van het spel in de politiek en samenleving. De Nederlander Johan Huizinga (1872 – 1945) was historicus, antropoloog en cultuurfilosoof. Hij is de grondlegger van de Nederlandstalige cultuur- en mentaliteitsgeschiedenis. Zijn Herfsttij der Middeleeuwen (1919), Erasmus (1924) en Homo Ludens (1938) worden tot zijn belangrijkste werken gerekend. Uit zijn werk blijkt een voorliefde voor sprookjes en bewondering voor de middeleeuwse ridderlijke ethiek. Vanwege het sterke literaire karakter van zijn werk is Huizinga meermaals genomineerd voor de Nobelprijs voor de literatuur.

What does it mean to be fair? Why do we feel unfairness so strongly? What has happened to us today that we spend more time condemning each other's views than giving each other a fair hearing? The idea of fairness is one of the most commonly-expressed concepts, not only in English but many other languages, yet nobody ever stops to think what it really means. We all simply take the word 'fair' for granted. In this polemical guide to fairness, Ben Fenton explains the meaning of the word, how it fits into our genetic make-up within the deepest recesses of our brains and why we need our innate sense of fair play now more than ever. Fenton explores the idea that the unconscious procedure that humans go through in deciding fairness is the vital balancing act between competition and cooperation, the two driving forces that have made us the super-species of Planet Earth. He describes the neurology, anthropology, psychology, history and future of fairness and looks at how it affects our lives through politics, law, sex, religion, race, sport, business and even war. As a reporter of thirty years' experience, Fenton brings all his skills to bear in a lively and challenging description of the profound inner meaning of a throwaway phrase and why it matters so much to every single person in the world to seek To Be Fair.
