Crafting and Executing Strategy remains mainstream and balanced, mirroring both the penetrating insight of academic thought (in the text) and the pragmatism of real-world strategic management (in the cases). Also, the text-book provides a definitive balance between the most popular approaches towards Strategic Management.

Thompson and Strickland's, Strategic Management, has always included the most recent research in strategy in a way that students can understand and apply it to business cases and problems. In addition, Thompson offers more coverage of strategy implementation than most other texts, which many instructors think is critical if students are to understand the "how" and not just the "what" and "why". Thompson's coverage of Michael Porter's classic 5-forces model is clearer and more detailed than in other texts, according to reviewers. With this edition the market leader looks better than ever before, offering a new 4-color design, improved writing style, and two new chapters on global and e-commerce strategy. The Thompson and Strickland cases have always been another strong selling point. Over the years, this author team has developed a great network of case authors and is able to select from the cream of the crop. And, having taught the course themselves for many years, they are very experienced in selecting the types of cases that will spark student interest and generate lively classroom discussions. Many of the cases reflect high profile companies, products, and people that students will have heard of, know about from personal experience, or can easily identify with. The new case line-up features an exciting collection of dot.com/New Economy companies. Cases are further selected to highlight other critical types of business and trends, such as non-U.S. companies, globalization, cross-cultural situations, relatively small, entrepreneurial firms, non-profit organizations, and more.

The distinguishing mark of the 19th edition is its enriched and enlivened presentation of the material in each of the 12 chapters, providing an as up-to-date and engrossing discussion of the core concepts and analytical tools as you will find anywhere. There is an accompanying line-up of exciting new cases that bring the content to life and are sure to provoke interesting classroom discussions, deepening students' understanding of the material in the process. While this 19th edition retains the 12-chapter structure of the prior edition, every chapter – indeed every paragraph and every line – has been re – examined, refined, and refreshed. New content has been added to keep the material in line with the latest developments in the theory and practice of strategic management. In other areas, coverage has been trimmed to keep the book at a more manageable size. Scores of new examples have been added, along with 16 new Illustration Capsules, to enrich understanding of the content and to provide students with a ringside view of strategy in action. The result is a text that cuts straight to the chase in terms of what students really need to know and gives instructors a leg up on teaching that material effectively. It remains, as always, solidly mainstream and balanced, mirroring both the penetrating insight of academic thought and the pragmatism of real-world strategic management. To stay competitive and meet market expectations in a global economy, both domestic and foreign companies must realign their manufacturing processes, make improvements, and increase their manufacturing capabilities. With large numbers of employees working in a network of domestic and foreign facilities, production processes are as varied as the products being produced. Manufacturing managers need a manufacturing plan or strategy that will bring structure to this complex environment. In *Manufacturing Strategy: How to Formulate and Implement a Winning Plan*, 2nd Edition, John Miltenburg offers a sensible and systematic method to: (1) evaluate domestic and foreign factories and international manufacturing and (2) plan the appropriate manufacturing strategy to be first in the market. Incorporating comments and suggestions from managers who used the first edition of *Manufacturing Strategy*, John Miltenburg expands and improves on his focus in the areas of: International Manufacturing — where the focus is on a company's international network of factories; Competitive Strategy — where managers must understand the role manufacturing strategy plays in their company's business strategy; and Manufacturing Programs — showing how programs such as quality management, six sigma, agile manufacturing, and supply chain management fit within the manufacturing strategy. *Manufacturing Strategy* gives managers a common language for dealing with manufacturing problems at both strategic and operational levels. It improves communication between manufacturing managers and those outside manufacturing (who will now have a better understanding of what manufacturing can and cannot do).
