Dan breekt de Burgeroorlog uit. Grady ziet zijn kans schoon om te vluchten, zijn vrijheid te herwinnen en zich te wreken voor het onrecht dat hem is aangedaan. Kitty is bang om te vluchten. Ze heeft nog nooit zelf een beslissing genomen, en nu staat ze voor de meest ingrijpende keuze van haar leven. Blijft ze bij Missy Claire, in de relatieve veiligheid van de slavernij? Of grijpt ze haar kans op vrijheid en op geluk met Grady, met alle risico's van dien? Ook Grady moet een keuze maken. Want uiteindelijk is er maar één weg die hem werkelijk naar de vrijheid zal leiden.

These essays, among the early writings of the great spiritual master Swami Muktananda, were first made available in the early 1970s to the ever increasing numbers of Westerners coming to spend time in his ashram in India. Until then, very few English texts could be found that discussed so openly the spontaneous spiritual awakening at the heart of the ancient and powerful path of Siddha Yoga meditation. Quoting generously from the poets and scriptures he loved, Swami Muktananda explores many subjects in these pages, including the nature of grace, the Guru-disciple relationship, the science of mantra, kundalini awakening, and the experience of devotion. All are viewed from the perspective of his own supreme attainment.

Synchrotron radiation is the name given to the radiation which occurs when charged particles are accelerated in a curved path or orbit. Classically, any charged particle which moves in a curved path or is accelerated in a straight-line path will emit electromagnetic radiation. Various names are given to this radiation in different contexts. Thus circular particle accelerators are called synchrotrons, this is where charged particles are accelerated to very high speeds and the radiation is referred to as synchrotron radiation. Suitable for a summer short course or one term lecture series this text introduces the subject, starting with some historical background then covering basic concepts such as flux, intensity, brilliance, emittance and Liouville's theorem. The

book then covers the properties of synchrotron radiation, insertion devices, beamlines and monochromators before finishing with an introduction to free electron lasers and an overview of the most common techniques and applications of this technology.

Algae offer potential to produce renewable chemicals and fuels using solar energy and carbon dioxide from atmosphere or in flue gases while simultaneously reducing the generation of greenhouse gases. Since these can be grown on marginal lands with micronutrients and macronutrients often present in waste streams, algae-based chemicals and fuels do not compete with foods. Still large-scale production of algae-based fuels and chemicals faces considerable technological and economical challenges and it would by necessity require a biorefinery approach wherein all the possible algal components are converted into value-added compounds. The present series on algal biorefineries represents a forum for reporting the state of the art of different technologies as well as the latest advances in this field. The volume II of this series complements the volume I in terms of the current state of the art. Different chapters in this volume address diverse issues ranging from genetically modified algae to new products to life-cycle analysis of algal products.

Path of Light provides a fresh, superb, and penetrating overview of A Course in Miracles (ACIM), encompassing what it is, how it was written, what it teaches, and, most of all, how to live it. Perry writes in a clear, straightforward fashion, and, like a storyteller, he uses simple words to relay the deep truth of the teachings of ACIM. More challenging than popular self-help summaries, yet more practical and engaging than a scholarly analysis, Path of Light will provide a new standard of reference on the most remarkable spiritual teaching originating in modern times. This is a skillful and elegant presentation from the warm heart and brilliant mind of one of the most respected teachers of A Course in Miracles. A softly illuminated portal that ushers us into the boundless room of light that is 'A Course in Miracles.' (Hugh Prather)

You are the bows from which your children as living arrows are sent forth ... Let your bending in the archer's hand be for gladness; for even as He loves the arrow that flies, so He loves also the bow that is stable. -Khalil Gibran Humanity continues to evolve. Today's children have unique qualities that are helping the planet evolve spiritually by moving from the "old" energy of fear (greed, corruption, competition, and stress) into the "new" energy of love (integrity, manifestation, and cooperation). The New Children possess specific characteristics to help them fulfill their purpose to bring the planet into a space where Peace and Honesty reign, where Harmony between all living creatures is the norm, and where Cooperation is given and expected as we realize that we are all connected to each other by Love. Differing from previous generations, these New Children are becoming more and more connected to Divine; they remember our

spiritual connection. Even though each child expresses this gift in a unique way, as a group they are a more intuitive, more telepathic, more sensitive generation. *Twin Shining Lights* is a beautiful narrative that introduces readers to this perspective on life—because story matters.

'The Path of Light' is a spiritual book designed to guide humans into the Light of Christ, as well as to strengthen those already in the Light of Christ to be firm and steadfast. The path of darkness, which promotes wickedness, cannot ultimately benefit the human race, only the path of Light in Christ can benefit us here and hereafter. The author himself, who came from the peak of darkness into the Light of Christ, wrote this book with a burning desire to lead people to the Light of God. Sound spiritual knowledge is imperative, if one's objective is to gain ultimate victory on the path of Light. Consequently, the Prince of Darkness and his cohorts can take advantage of man's lack of true spiritual knowledge of the ways of God to manipulate, dominate and destroy even the people of God. Thus, God Himself said: "My people are destroyed for lack of knowledge" (Hosea 4:6). A believer who is bereft of sound spiritual knowledge, as taught by the Harbinger of the Last Covenant, is like a man with a bucket of water on his head, who goes about looking for a cup of water to drink. This situation is not the best for anyone. It is an enslavement of darkness, sustained by the illusions of ignorance. Ignorance is darkness, and darkness must flee from the Light flowing to us from God through Christ. This book is set forth by the Spirit of God as a Light to dispel darkness, and in the name of Our Lord Jesus the Christ, this work will assist you to be completely situated on the true path of life; the path of Light -- the path of perfection in Christ. The book, under the present title, 'The Path of Light Vol. 1', has a complete new chapter added to the previous chapters of the former title. And apart from the added new chapter, the previous chapters are also revised and updated by the author. The

second volume of this book, ('The Path of Light Vol.2',) is one of greatest spiritual treatise of all times. This is so because it is a Divine message which the Harbinger of the Last Covenant received directly from the Lord Himself in the realms beyond. It is an important message which the reader, after reading 'The Path of Light Vol. 1, should endeavour to read. And if you read the second volume of 'The Path of Light' first, also endeavour to read the first volume. 'The Path of Light Vol. 1' has five chapters on diverse spiritual issues, which includes but not limited to some messages which the author received directly from the Lord in our time. 'The Path of Light Vol. 2' comes under a different setting. In each page of this second volume, the Harbinger of the Last Covenant presents a verse of the message he directly received from the Lord, as well as his brief comment on each verse of such message. My sincere prayer is for the reader of the first and second volumes of 'The Path of Light' to be lifted and sustained on the path of Light, by the Spirit of Light in Christ Our Lord . Amen.-- Lady Imaobong Udeme Uzorma (Wife of the a

This comprehensive and well-written book provides a thorough understanding of the principles of modern physics, their relations, and their applications. Most of the developments in physics that took place during the twentieth century are called "modern"-something to be treated differently from the "classical" physics. This book offers a detailed presentation of a wide range of interesting topics, starting from the special theory of relativity, basics of quantum mechanics, atomic physics, spectroscopic studies of molecular structures, solid state physics, and proceeding all the way to exciting areas such as lasers, fibre optics and holography. An in-depth treatment of the different aspects of nuclear physics focuses on nuclear properties, nuclear models, fission, fusion, particle accelerators and detectors. The book concludes with a chapter on elementary interactions, symmetries, conservation laws, the quark model and the grand unified theory. Clear and readable, this book is eminently suitable as a text for B.Sc. (physics) course.
