This comprehensive overview provides readers with a clear understanding of the various parameters controlling morphologies. The book also reviews key properties of ZnO including optical, electronic, thermal, piezoelectric and surface properties and techniques in order to tailor key properties. There is a large emphasis in the book on ZnO nanostructures and their role in optoelectronics. ZnO is very interesting and widely investigated material for a number of applications. This book presents up-to-date information about the ZnO nanostructures-based applications such as gas sensing, pH sensing, photocatalysis, antibacterial activity, drug delivery, and electrodes for optoelectronics. Reviews methods to synthesize, tailor, and characterize 1D, 2D, and 3D zinc oxide nanostructured materials. Discusses key properties of zinc oxide nanostructured materials including optical, electronic, thermal, piezoelectric, and surface properties. Addresses most relevant zinc oxide applications in optoelectronics such as light-emitting diodes, solar cells, and sensors.

This volume reports in detail how a particular portion of the American wilderness developed into a settled farming community. To fully comprehend the history of the American people in the early national period, an understanding of this transformation from forest to community—and the pattern of life within such communities where the vast majority of the people live—is essential. Three major conclusions emerge from Philip L. White's study of Beekmantown, New York. First, the economic advantages of the frontier attracted a first generation of settlers relatively high in social and economic status, but the disappearance of frontier conditions brought a second generation of settlers appreciably lower in status. Second, White rejects the romantic notion that the frontier fostered equality and argues instead that the frontier's economic opportunities fostered inequality. Finally, in contrast to revisionist arguments, he affirms that in Beekmantown the Jacksonian period does indeed warrant characterization as the era
