"This thirteen edition of Human Geography retains the organization and structure of its earlier versions. Like them, it seeks to introduce its users to the scope and excitement of geography and its relevance to their daily lives and roles as informed citizens. We recognize that for many students, human geography may be their first or only work in geography and this, their first or only textbook in the discipline. For these students particularly, we seek to convey the richness and breadth of human geography and to give insight into the nature and intellectual challenges of the field of geography itself. Our goals are to be inclusive in content, current in data, and relevant in interpretations. These goals are elusive. Because of the time lapse between world events and the publication of a book, events inevitably outpace analysis. We therefore depend on a continuing partnership with classroom instructors to incorporate and interpret current events and emerging geographic patterns"--

Analyzing experiences of White mothers of daughters and sons of color across the U. S., Chandler provides an insider's view of the complex ways in which Whiteness norms appear and operate. Through uncovering and analyzing Whiteness norms occurring across motherhood stages, Chandler has developed a model of three common ways of interacting with the norms of Whiteness: colluding, colliding, and contending. Chandler's results suggest that collisions with Whiteness norms are a necessary step to increasing one's racial literacy which is essential for effective contentions with norms of Whiteness. She proposes steps for applying her model in education settings, which can also be applied in other organizational contexts.

This book explores an innovative set of critical narratives, accounts and engagements by different authors about their professional mobility and how that relates to the discipline and their life experiences. Human Geography and Professional Mobility seeks to encourage, influence, and help students understand geographic concepts based on critical reflections, international experiences, and practical insight laid out in stories of real people, real geographers, and real college faculty, that students can relate to. This volume is less theoretical and more personal insight-based, wherein first-hand and personal accounts of practical experiences are explored, which renders the text supplementary reading for human geography, population geography, world geography, and migration/mobility classes. With critical navigation of spaces in response to several geographical questions, this book offers a novel perspective on professional mobility of geographers which will be of interest to students and academics in the fields of geography, tourism, sociology, and anthropology.

A long life fully lived might appropriately be documented in some concrete, long-lasting, retrievable form. So, at the risk of being charged with hubris, I here have accounted for those years, giving credit to ones who accompanied me along the way and implying the values that have motivated me. It has been a life of striving, of involvement, of reaching out for new experience, of celebrating successes and learning from failures. This journey has been deeply rewarding, taking me from the onion fields of Western Colorado to the tranquil forests of Central Oregon, through junior high classrooms and hotel conference rooms, over High Sierra passes, to the offices of government and to many foreign countries. Here I share that life story.

Each year, Israel's young men and women are drafted into compulsory military service and are required to engage directly in the Israeli-Palestinian conflict. This conflict is by its nature intensely complex and is played out under the full glare of international security. So, how does Israel's education system prepare its young people for this? How is Palestine, and the Palestinians against whom these young Israelis will potentially be required to use force, portrayed in the school system? Nurit Peled-Elhanan argues that the textbooks used in the school system are laced with a pro-Israel ideology, and that they play a part in priming Israeli children for military service. She analyzes the presentation of images, maps, layouts and use of language in History, Geography and Civic Studies textbooks, and reveals how the books might be seen to marginalize Palestinians, legitimize Israeli military action and reinforce Jewish-Israeli territorial identity. This book provides a fresh scholarly contribution to the Israeli-Palestinian debate, and will be relevant to the fields of Middle East Studies and Politics more widely.

If one wants to know what children in communist East Europe were told to think about their nation and their leaders, their class enemy, and their so-called Soviet friends, no better source exists than textbooks. In textbooks the dogmas of communism were communicated in their most simplified form and manufactured in the millions for mass consumption. In *Textbook Reds*, John Rodden shows how the now-defunct German Democratic Republic (GDR) shaped generations of East German youth and how the imprint of Marxist-Leninist ideology remains today on the hearts and minds of millions of eastern Germans, more than fifteen years after the fall of the Berlin Wall. Drawing on a rich and varied collection of materials--a total of more than two hundred textbooks, teaching guides, school songbooks, educators' professional journals, and school examinations--Rodden spotlights the "textbook mentality" that permeated East German society. In the GDR's campaign to win the minds of men, any critiques of the Party were equated with disloyalty and the bourgeois sins of individualism, negativism, and cosmopolitanism. Citizens who broke free of such indoctrination still bore marks of its influence, even long after leaving school--and long after the GDR's dissolution in 1990. The second part of the book offers a glimpse of post-communism today. Through interviews with dozens of teachers and students from contemporary eastern Germany, we see that East German faculty and students constitute perhaps the largest, most articulate, most traumatized segment of the population affected by events since 1989. Not just a study in comparative education, *Textbook Reds* is also a work in the sociology of education, literary sociology, and literary history. Rodden shows that the deepest roots of GDR society were indeed located in the institution that molded the youth of its citizens, and that the most searching questions about East German identity and the repression of its political past are in fact to be found there.

Elizabeth's story is like that of a garden left untended for too long, with weeds as bounteous as blossoms and stone walkways buried beneath tangled vines and daffodils. Beauty to be found, though amidst much neglect. When betrayal strikes at the heart of her very existence, Elizabeth Landis retraces the path of her life and her marriage, discovering along the way memories both painful to the touch and a joy to embrace. Pruning the garden of her life requires an honesty new to Elizabeth, but offers the promise of mercy...and perhaps even a grace to bestow.

With this highly accessible and unique little guide, Larry Cuban offers educators indispensable tools to make sense of the daily complexities they encounter in their work. Teachers face dozens of classroom situations where conflicts occur. Similarly, principals wrestle with school issues that call for changes in attitudes, behaviours, and procedures. Because the process is so familiar, even expert teachers and principals often have difficulty in explaining what it is that they do and how they go about solving problems and coping with dilemmas in their classrooms and schools. Using concrete and varied examples drawn from the workplace, Cuban presents vivid and provocative case studies of practitioners' experiences in urban and suburban schools that deal with the routine conflicts of school. He draws on his own extensive experience in public schools and his research into teaching and administration to set forth a practical framework for identifying, defining, and coping with both puzzling problems and tension-filled dilemmas. A much-needed resource for both new and experienced practitioners, *How Can I Fix It?* focuses on common skills that practitioners have, but seldom take time to consider, and applies these skills to concrete situations.
